## STRIKE MARKED BY DISORDERS

## New Orleans Officials Take Steps to Curb Street Car Men's Riots

NEW ORLEANS, Aug. 14—(AP)—After being attacked by an angry mob in the council chamber, the city commissioners late today took steps to curb a wave of wild disorders which swept through the city in renewed outburst of rioting by street car strike sympathizers.

Four city commissioners were set upon by groups of a mob of 500 or more persons in and about the city hall, a dozen policemen assaulted, four persons shot and a number of disturbers arrested on federal and state charges before sufficient policemen arrived to quell the fury.

The council calmly pursued its duties after the riot, and announced its intention to preserve law and order in the strike, and a determination to see that lawlessness is outlawed and the guilty brought to justice.

For an hour shouting men and women surged within the corridors of the building, where a delegation of 200 union men met with the council to demand continuance of bus operation until driven out at the point of police guns.

A second rush on the municipal building was halted by police with drawn guns and tear bombs, and the violence then settled into group attacks on street cars operated by non-union workers.

Deputy United States marshals in automobiles charged a crowd attacking a street car in front of the federal building and armed marshals were placed on patrol on Magazine street to protect the property of the car company under the federal injunction against strike violence. During the July 5 destruction of street cars on Canal street, a motorman escaped while Conductor George Fisher was beaten severely. Every window in the car was smashed with rocks and bottles. Another crew member was beaten at South Rampart and Julia street.

The day's disturbances started in the council chamber when T. Semmes Walmesley, acting mayor, adjourned the session because of its wild demonstrations. He and other members of the council were gouged and pounded with fists in their efforts to escape from the chamber.

Police Captains Henry Melson and Eugene Casey were beaten in their rescue of Mr. Walmesley. Four shots were fired at the floor by Captain Melson in an effort to free himself from his attackers.

## STEEL BARONS WIN SKIRMISH

## Manganese Ore to be Sent Into U. S. Duty Free Is Decision

By D. HAROLD OLIVER  
Associated Press Staff Writer  
WASHINGTON, Aug. 14—(AP)—The steel industry won an important victory today with the approval by the senate finance committee Republicans of an amendment to the house tariff bill to permit the free entry into the United States of manganese ore.

The majority committee adopted the amendment by a vote of 6 to 5 which was taken in reconsideration of a previous vote of 7 to 4 in favor of granting the domestic ore producers additional protection. No explanation for the reversal of position was given.

Informed of the action, Senator Borah of Idaho, one of the Republican independents who is expected to take a leading part in

opposition to many individual sections of the measure, said: "They might as well report the bill now because the senate is going to write it."

After voting to place manganese ore on the free list, the eleven Republican committee members approved amendments reducing to sixty-five one-hundredths of a cent a pound the bill rate of one and seven-eighths cents on ferromanganese, containing more than one per cent of carbon, and manganese metal, silicon, boron, and ferromanganese and spiegeleisen, containing not more than one per cent carbon. The 15 per cent ad valorem rate in addition to the specific duty on manganese metal and the items grouped with that product would not be disturbed.

The present duty of one cent a pound on manganese ore containing in excess of 30 per cent metallic manganese was enacted in 1922 and was retained in the house bill.

The Republican group voted first to retain the duty, but to make it apply to ore having a metallic manganese content of more than 10 per cent.

This change, the ore producers had contended, would have benefited them by curtailing importations of low grade ores which were coming in duty free and depriving the mining interests of their home market.

The ore producers, comprising

the American Manganese Producers' association, not only had sought this change, but had urged an increase to 1 1/2 cents a pound in the one cent rate on ores containing more than 30 per cent metallic manganese.

They argued that under the present tariff the known tonnage of commercial manganese ore in the United States had been greatly increased and that further improvements in processes would tend further to enlarge the usable reserves of manganese.

On the other hand, representatives of the American iron and steel institute contended the duty had failed to encourage growth of domestic ore production, that after seven years of operation of the tariff the steel manufacturers still were importing 95 per cent of their manganese supply, and that the duties on ore and manganese alloys had cost the steel producers nearly \$46,000,000.

## Good food promotes good health

A little sugar is so helpful in making the healthful foods delicious

HEALTH is an indispensable feature in the efficient life of this busy world. If most of us were born healthy would eat and exercise properly from earliest childhood through adulthood, most of us would be strong, healthy and happy. Good foods, varied foods, balanced foods, are becoming more and more important in the art of keeping well.

Nearly everyone knows that a balanced diet of milk foods, cereals, fruits, vegetables and meats are needed for health. But taste enters in and makes it hard for a great many people to enjoy the things they should eat. That is why sugar is being acclaimed as the world's greatest blessing when it comes to making a varied diet palatable and enjoyable. If people like the proper foods, they are almost sure to eat them.

A group of women cooking experts, working in a kitchen high up in a New York skyscraper, recently rediscovered an old secret that a dash of sugar added to vegetables while they are cooking develops their flavors, improves their colors, and makes them fresher and better to the taste. Sprinkle sugar over cereals and watch how much more the children enjoy them. Use sweetened milk desserts and note how much easier it is to get the members of your family to eat the amount of milk they should each day. Use fresh fruit salads with a sprinkling of sugar, and slightly sweetened stewed fruits for health and enjoyment. Remember a few cookies or cakes and ice cream for topping off the meal. A bit of sweet makes the meal complete. The Sugar Institute. Adv.
