BOOKS in REVIEW... by R. C. E.

"THE MAGIC MUSIC SHOP"

by Mary Graham Bonner

Should prove instructive, as well as interesting to children, as they will gain a great deal about music from the instruments. There's a small girl, Minna, who loves the music shop better than any other in town—better even than the peanut man's stand. The musical instruments were alive. She finds there magic entertainment in story and song, and loves it all. This book was illustrated by Luxor Price, and the music is by Harry Meyer. It's a gay story, and there are merry tunes to play.

Another fine and exciting tale is "Prince Bantam," by McNeer and Ward, and it is published by the McMillan Co. It is an adventure in old Japan, and there's the usual price, and also the giant to add the element of excitement. It's a series of old legends with a medieval background, and it will keep the young listeners stirred and breathless. The chapter heads alone are exciting, and the illustrations are full of action. They are in black and white, and were done by the authors themselves. Boys especially will enjoy this one—there's just enough of the blood and thunder element upon which they thrive.

All boys that are interested in aviation will gloat over a new book that Joseph Lewis French has written. He calls it "The Big Aviation Book for Little Boys," and he tells the stories of Byrd, Lindbergh, Rickenbacker, and other heroes of the air in a most interesting and intimate manner. It is a beautifully printed and bound volume. There are pictures that the youthful air aspirant will enjoy, because they are photographs of the actors and events

in the story. Commander Byrd has written the introduction for this volume and this provides an added attraction as far as the book goes.

After a summer of playing in the water either at the beach, or at home in a near-by mill stream, the children will have developed amphibian tendencies, and I've come across just the book for them when they get to yearning for water sports again. It's a book entitled "Holiday Pond," by Edith M. Patch. It's subject matter includes all of the familiar water animals, and the youngsters will feel that they really know their water friends very well, when they have finished this clever book in its cool, green binding.

A book that the Robert McBride and company are heralding as one of their most attractive children's books that is to be published this fall is "Abby in the Gobi," by Florence Choate and Elizabeth Curtis. It is said that the story is an unusually original picture book all about Abby, who is the last of the dinosaurs, and how she has lost her egg in the Gobi Desert. The authors of this promising book spent a few hours in Salem one day last week. They are making a motor trip through the western states.

"LIV"

by Kathleen Coyle (DUTTON, publishers)

To struggle through some 200 pages with a girl who is struggling with the problem of expressing herself is indeed tedious, especially as she reaches no ultimate conclusion as to how she should "express" herself. This anomalous story has as its background both Norway and Paris. Liv flees from her home to Paris, and there she has a few experiences that interest one but momentarily, and then we are taken back to Norway with her. It's all very drab and commonplace, this—the only thing that pleased me at all were the descriptions of the Norwegian settings.

"STRESEMANN: THE MAN AND THE STATESMAN"

by Rochus, Baron von Rheinbaben

We have all watched the career of Gustav Stresemann with interest, because he is the man who has brought Germany back to a respected place among other nations. He has succeeded in bringing it out of the chaos that it has been in ever since the war; he has helped dissolve the old hatred that the allies carried towards Germany. He has been a leader of his people, and he is undoubtedly one of the greatest men of this time.

Baron von Rheinbaben's biography traces Stresemann's career

up until 1923, when the world first picked him out as a leader. He gives Stresemann's policies, and the reasons for his actions and choices in such matters. We get a splendid picture of the man from this book as it was written by one of his own party members, by a man who knew his ideas and his character almost inside out. We do not get an essentially human picture of the man; it is a little formal in its presentation, and a bit stilted for this very reason. It leaves one cold, with no emotional reaction.

It has a certain dignity that we seldom encounter in an American biography. Americans are prone to delve too deeply into the subject's private life; that sometimes spoils it and too often leaves the reader with the feeling that he'd like to brush his teeth immediately—to make him seem more clean after absorbing such mark. But this is beside the point.

In "Stresemann: The Man and the Statesman" we touch the highlights of a career of a man who has the highest of executive powers, and he wins our sincerest admiration. He has accomplished an almost miraculous feat in getting Germany where she is capable of winning recognition from the world again.

This book is tolerant; not once do we come across anything that is not so. It shows Stresemann as the statesman, and not as the man. I enjoyed it the more for this very reason. I succeeded in grasping some knowledge of Germany itself, instead of just the personal affairs of a man of whom we hear a great deal.

If you're interested in history, and events of the last quarter of century, dip into this, and you'll soon find if you'll be interested or not.
