"John" Selects Love Nest

When John Coolidge takes Florence Trumbull as his bride from her father's luxurious mansion in Plainville, Connecticut, he will in all probability install her in a \$78.00 four-room apartment in the suburbs of New Haven. Those who have read Coolidge's recent announcement that a man should not spend more than one week's salary for rent, are wondering just how John's reported salary of \$30.16 per week can be reconciled with the \$78.00 rental.

Harry Hobson is Patronized By Many Famed Sportsmen

By MADALENE L. CALLIN

How a western product is being made famous throughout the United States and Canada is shown by the letters received by Harry Hobson, well known sportsman and maker of archery and fishing tackle.

Mr. Hobson has his shop on the highway between Lyons and Mehana and here he makes archery and fishing tackle that is known wherever lovers of these sports are to be found.

Rocky mountain yew wood is the material from which Mr. Hobson makes his best bows. He believes that this Rocky Mt. yew is the best to be found on the Pacific coast and 25 years in the government forestry service have made him an expert in judging woods.

According to Mr. Hobson the toughest wood is to be found at

the higher altitudes and this is what is secured for his bows. The wood is only usable when cut in the winter and then it is aged for long periods of time. He has on hand some wood that is 19 years old. The best wood is to be found in old timbers such as barn sills.

Mr. Hobson sells bows ranging in price from \$15 to \$100. His bows are made to order, to fit the one who is to use them.

The Hobson arrows are made from Port Orford cedar and the hunting arrows are tipped with an especially made cedar.

The bow strings are all made from Salem linen, treated by the Hobson special process.

The fishing tackle made by Mr. Hobson has gained almost as wide fame as the archery tackle. The Hobson rod sells for \$125 and all manner of rods and fishing tackle are made.

No doubt that much of Mr. Hobson's success is due to the fact that he is an expert in the sports for which he makes supplies. Both Mr. and Mrs. Hobson and their son have won prizes at archery tournaments and have held Pacific northwest and national championships.

The magnitude of Pacific northwest fires this year as compared with last year was brought out by White in an estimate of acreage destroyed. He said about 164,000 acres have been burned this year while only 22,400 acres were destroyed in 1928.

Lightning was said to have caused a majority of fires this year. 633 out of a total of 1104 having originated in that way. Smokers and campers were blamed by White for 328 fires, among them the disastrous Colville blaze.

YANKEE FIRM GETS RUSSIAN CONTRACT

NISHNI NOVGOROD, U. S. S. R., Sept. 3.—(AP)—American engineering skill, ingenuity and energy has been called into play by Soviet Russia in the building of a great new model industrial city just north of here, between the Volga and the Oka rivers.

In competition with engineers of six European countries, the Austin company of Cleveland, Ohio, has been awarded a contract by the Soviet government to construct a city on modern American lines.

It may be named Austingrad as a compliment to its American builders.

The principal product of the center will be Ford automobiles and motor trucks, ultimately 500,000 automobiles annually will be produced.

Involving the expenditure of \$40,000,000 by the Russian government, this is the largest contract of its kind given by the Soviet authorities since they gained power 12 years ago and the new city will contain the largest automobile plant in Europe.

Russian engineers had calculated it would require nearly four years to build the city but George E. Bryan, Jr. and Fred A. Colman, representing the Austin company, said "they could do it within fifteen months. They were promised a big bonus if it was done in less than fifteen months."

STOCK MARKET RUNNING WILD

Bull Party Still in Saddle Despite Difficulty in Making Advance

NEW YORK, Sept. 3.—(AP)—With the bull party still in the saddle and riding still harder, the stock market entered the new month today, but progress became increasingly difficult during the afternoon, and before the close of the session some of the gains were lost.

More than half a hundred issues were hurled up two to nearly ten points to record high levels, including such leaders as American Telephone, U. S. Steel, International Harvester, Chesapeake and Ohio and Southern Pacific.

Recessions of 1 to 5 points from the best levels of the day were fairly general, however, when a wave of profit taking swept over the market in the afternoon.

Outstanding points in the day's business were announcement that Montgomery Ward's August sales reached a new high record 46 per cent above that month of 1928, and a report that one copper producer had raised the domestic price 1-4 cent to 18 1-4c a pound.

Automobile production reports for August varied, Chevrolet showing a substantial reduction, while Buick and Packard showed gains over the like month of last year.

U. S. Steel was again brought forward as a leader during the upturn, when it was pushed up about 6 points to a record price at 261 3-4, but it lost about two thirds of its gain later. Youngstown Sheet and Tube rose 5 points to a new top, and the coppers generally responded to the red metal price increase, American Smelting selling up about 5 points to a new peak above 129.

Several of the utilities were hurried upward, American Water Works, American Power and Light, International Telephone Public Service of New Jersey and Standard Gas and Electric reaching new high levels in wide gains. In the merchandising group, Best & Co., and R. H. Macy mounted about 7 points each to new tops, but Montgomery Ward encountered profit taking on the August sales announcement, and closed off a couple of points.

DUCHESS REAL MOTHER

Zena Cat Brings Home Chinese Pheasants "BABIES" MADE HAPPY

ZENA, Sept. 3.—A true mother will do extraordinary feats for the sake of her babies, even the dumb animals often proving their love for their little ones by doing what would seem to be the impossible, even going so far as to break the law for them.

That is what Duchess, bob-tailed black and yellow spotted mother cat, belonging to Mrs. Jas. A. French of Zena, did recently when her kittens got hungry for fresh meat. Duchess is accustomed to roam the fields and woods at will and frequently brings in squirrels and small birds. One day when she was coming back from a hunt her peculiar actions attracted the attention of her mistress. She would run a few steps and then stop as though to rest. Upon investigation it was found that Duchess was dragging a full grown China pheasant home.

Her kittens were soon growling and fighting over the toothsome meal. The bird was still warm, proving that Duchess had caught it herself.

Duchess is just a medium sized cat and the mystery is, how did she catch the China pheasant which was as large as she is? She came from a bob tailed breed of cats and who knows but what she inherits her hunting abilities from some wild cat ancestor. Funnier things than that have happened.
