Wall Street Navigators Decide to Shorten Sail as Prices Drop

NEW YORK, Sept. 10 .- (AP) A pronounced tendency to shorten speculative sail was evident in the stock market today. Although aggressive bullish operations in a few rather mercurial issues sent them rapidly higher, the general tendency was emphatically downward, scores of leading stocks ending the day 2 to marked with the day for opening 12 points lower. Sunday Mr. Madsen noticed that his flock of chickens appeared to be badly frightened and were apparently trying to hide. Pre-sently he spied a couple of hawks circling around the chicken run.

Mr. Madsen got his gun and killed both birds with two shots. The larger hawk measured 52 1/4 inches from the tip of one wing to the other.

The other hawk was of medium size. Last year Mr. Madsen killed a hawk measuring 56 inches across the wings. Perhaps their chicken diet has something to do with the size they attain.

More Flights for Additional Speed Records to be Undertaken

CALSHOT, England, Sept. 10 -(AP)-Not satisfied with the fact that two of their number today flew faster than men ever had flown before, British seaplane racing pilots tonight had under consideration fresh attempts for Thursday.

Squadron Leader A. H. Orlebar, captain of the British Schneider cup team, sped over the three kirometer straight-away course twice today at a speed exceeding six miles a minute with a maximam of one leg of 368.8 miles an hour. The average for the four iaps, two in each direction, which constitutes the new world record, was 355.825. He used the blue and silver super-marine Rolls-Rouce S-6 which last Saturday won the second leg on the Schneider trophy for England.

overed in less than one minut

The official timing of the flights by a new device gave the speed of Orlebar as 368.8, 345.3, 365.5, and 343.7 miles an hour, making an average of 355.825. The four best successive runs by Lieutenant Stainforth, were 351.3, 328.3, 336.2 and 329.3, giving an average of 336.3.

Firefighters and road workers alike are finding the dry weather a bit troublesome. The latest reported result of the prolonged dry spell is the drying up of a creek near the Union hill rock crusher. This is the first time the creek has been dry since the establishment of the rock crusher. Water from this creek was used to run the crasher, as it was a steam plant; now it will be necessary either to haul water for the boilers or else install an emergency gasoline power plant. Oscar Hovern of Turner was sent Monday to put the plant in order so that several thousand yards of rock needed this season may be Preceding him over the course crushed there.
