PEACE NEGOTIATION PAUSES FOR TIME

LONDON, Sept. 13—(AP)—With agreement on naval power reached in principle, further Anglo-American negotiations for disarmament will wait until Prime Minister Ramsay MacDonald confers personally with President Hoover three weeks from now, it is understood in well-informed circles here tonight.

Progress has been so steady and the understanding arrived at so satisfactory, it is stated that it will be unnecessary to take with him a group of technical experts when he leaves England on September 24th for the United States. Unlike the memorable Washington arms conference of 1921-22 it appears there will be no array of experts forming a huge delegation. Rather, Mr. MacDonald's mission will be a personal one.

"As things are going at present," a political observer remarked today, "it seems as if the prime minister's travelling equipment will consist only of his golf clubs."

A cabinet meeting this evening attended by 12 ministers caused considerable speculation whether the disarmament problem was discussed but there was no announcement made.

Oregon wheat production is now placed at 3,040,000 compared to 3,230,000 bushels last year and the average of 4,699,000 bushels.

Other Oregon crops show no appreciable change from earlier estimates. Is your child undernourished?

Surprising results disclosed by New York survey

A SURVEY of one million school children conducted by the Department of Health of the city of New York, disclosed that 20% of the children were seriously undernourished and in need of a physician's care. More than 60% were reported on the border line of malnutrition. Only a trifle more than 17% were found to be normal. This survey was not limited to the so-called poorer classes. It was representative of the entire city. It indicated that four children out of every five are in immediate need of a more carefully selected diet.

Mothers should see that their children eat sufficiently of milk, fruit and vegetable foods. The important step is to make these foods so enjoyable that children will eat them.

Authorities recommend a little sugar used judiciously to assist mothers in making foods appetizing. A small sprinkling of sugar on cereals, as one eminent food scientist phrases it, takes the "fight" out of eating cereal. Citrus and other fresh fruits, berries, stewed fruits, are made more appetizing by a dash of sugar. Wise mothers make junkets, blanc-mange, custards, and other milk desserts to encourage the eating of milk.

Note this: If you want to improve the taste of healthful vegetables just add a dash of sugar to them while they are cooking (preferably in little water). Try it and you will be amazed how much more tasteful the vegetables become. Candy, ice cream and cookies are recommended for dessert. A bit of sweet makes the meal complete. The Sugar Institute.
