For Particular People

Now is a good time to have the radio looked over, tested and put into first class condition. A radioareceiver is a very delicate piece of apparatus and no matter how well constructed, should have attention from time to time to maintain it in order for best results. Often a little of this kind of work will make a marked improvement in tone, quality and reception.

We are technically trained for this work and have the most modern equipment for performing this service in an efficient manner. A telephone call will receive

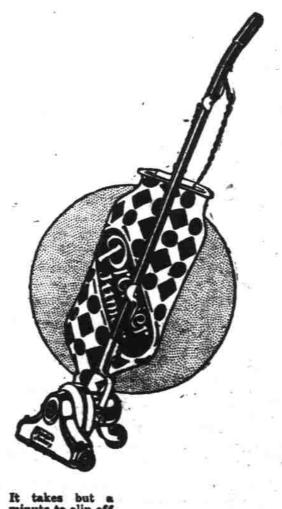

prompt attention
