Old doctor's idea still helping Elderly People conquer constipation

DR. CALDWELL made a startling discovery shortly after he graduated from medical school back in 1875. He found great numbers—especially older men and women—suffering from constipation, who were taking harsh laxatives and purgatives. So he concluded that many things people take for constipation do more harm than good, and physicians of today are of the same opinion.

This thought made Dr. Caldwell conduct a search, and out of it came the prescription which made him famous. Over and over he wrote it, when he found people bilious, headachy, out-of-sorts, weak or feverish; with coated tongue, bad breath, no appetite or energy. Its action was so thorough even in the most obstinate cases, and yet so gentle with women and children.

The product you get from your drug store, today, when you ask for Dr. Caldwell's Syrup Pepsin is put up exactly in accordance with this prescription. It has become the world's most popular laxative. It is a pleasant tasting mixture of fresh herbs and other pure ingredients; it is a real corrective for constipation for men, women and children.
