Members of Monmouth Staff Enjoy Jaunt Into Southern And Eastern Part of State

By BEULAH H. CRAVEN
MONMOUTH, Sept. 28.—Mrs. Addie Robards, assistant dean of women at the Oregon Normal school and her daughter, Miss Mary Robards, primary supervisor of the training department of the Normal at Independence, are home from an extensive motor trip through southern and eastern Oregon.

They visited the Normal buildings at Ashland and were enthusiastic about the beauty of the grounds surrounding. Leaving Ashland they made their first pilgrimage to Crater Lake, proceeding on to Bend and to Burns. At the latter place they were guests of Mrs. Geer, a former Normal student; and were taken across the desert to see the 8,000 acre Bill Hanley ranch; also the Island ranch of 38,000 acres, both of them show places of eastern Oregon, and reminiscent of real cowboy days of the west. A herd of 972 yearling Shorthorns was an interesting feature at the Hanley ranch. At the Island ranch they visited the family of the manager, Mr. Oaks, who is a relative of the Herren family of Polk county. Another place of interest observed near Burns, was the historic castle built many years ago by a wealthy eccentric German.

Stopping at Vale, Ontario and many other points along the John Day highway, they visited practically every school available, as almost every teacher encountered was a former student of the Monmouth, who knew them well here. At La Grande they visited the beautiful new Normal buildings and were taken on a personally conducted tour of inspection by Miss Kate Houx, a Monmouth graduate, and a former critic of the training school at Independence, who is now director of training schools at La Grande.

Four days were spent at the home of their personal friend, Mrs. Walter M. Pierce, and a particularly delightful time enjoyed investigating the many details of interest about the 5,000 acre ranch, just 6 miles from La Grande, which surrounds this attractive residence, one of the most beautiful homes seen by the Robards ladies on their entire journey. A crop of 48,000 bushels of wheat has just been harvested by Mr. Pierce, and 2,300 lambs had recently been brought down from summer pasture for market.

Mrs. Robards mentioned, incidentally, that Mrs. Pierce has already identified herself helpfully with grange and community work.

ter Francis having been a student here, and more of the famed eastern Oregon hospitality was enjoyed.

Mrs. Roberts states that the trip was a revelation to her of the almost limitless possibilities of Oregon in its vast magnitude. Born and reared in Indiana, she has lived in Oregon only about 5 years, and while contacting with thousands of students from all sections, in her work at the Normal, she feels that she has received an invaluable fund of information about the geography, resources and environmental conditions of this great state, which will be of enormous benefit to her as a preceptress of Oregon students.
