Accept these gifts with our Compliments

Do you think of your newspaper merely as a means of finding out what the famous people in the world are doing, saying, thinking? As an impersonal record of events which do not concern you at all? We have something more than that to offer you. For instance: Please accept today with our compliments these things, which you'll find in our pages: New and better ways of performing old household tasks . . . means of saving steps, time, effort . . . labor-saving devices . . . short-cuts to efficiency . . . money-saving. "Why," you say, "you're probably talking about the advertisements!" Just so—we are.

There are no businesses in the United States that are conducted on so large a scale and expend such large sums of money as do our public schools. No business spends its money with as little effort toward true economy.

We, who are styled educators, need to be more concerned with how we spend public tax moneys and with results obtained from them. Our objective should be that equal educational opportunities of the most efficient type be made available at minimum cost for every child, both rural and urban, living in the same county.

A county system of schools, without this ultimate objective, has not justification for its existence in American democracy of the twentieth century.

In America, the commercial world, during the past half century by wise and efficient application of proper administrative machinery, consolidations and adequate supervision, has built commercial enterprises which are internationally known. Small manufacturing plants located in different parts of the country have been consolidated. Small companies owning short-line railroads, have united under a few great systems that are handled by small boards of directors and competent superintendents.

Hotels, oil refineries and mercantile establishments located and operated by different heads over the country have been consolidated in order to give better service at less cost. Our highway systems have been placed in the hands of the state and nation.

Rivers, mountains and deserts have been crossed. Barren wastes have been traversed by modern highways where there was little available tax money to support the construction. The business world has installed adequate administrative machinery emphasizing scientific research, expert supervision, centralization and consolidation.

Yet, in the face of this, America has 160,000 one-room schools where 4,000,000 farm children attend. To my way of thinking, this is pathetic.

Modern highways, improved methods of transportation, telephones, radios and hundreds of other civilized inventions have completely changed our whole social life.

Mr. and Mrs. G. R. Dismore spent Thanksgiving at the home of Mr. and Mrs. H. A. Dowd at Gervais.

Mr. and Mrs. Ole Jacobson spent Thanksgiving at the home of Mr. and Mrs. Adolph Bosshardt at Lafayette.

Mr. and Mrs. Owden Holiday and family were dinner guests at the home of Mr. and Mrs. E. Lynch Sunday.

Mr. and Mrs. Howard Stephens and family spent Sunday at the home of Mr. and Mrs. Gus Prang of Bethel.

Most of the farmers have their grain in but the ground is so dry that very little has come up.

Miss Barbara Rogers had a party at her home Friday evening.

Think of the advertisements—and read them—as news. News of the world of goods and things . . . news of scientific achievement accomplished for your benefit . . . news that concerns you far more directly than an account of boundary disputes in Baluchistan can ever concern you.

Read the advertisements regularly, and use them as millions of other people are doing—to save you time, effort, money, trouble, when it comes to buying the things that make life a little easier . . . a little brighter. Reading the advertisements will keep you in step with the rapidly advancing standard of living in America today.

Every day there's something new in the advertisements as well as on the front page. Be informed on all sides!

Mrs. Mabel Powers Entertains Students

An interesting innovation on the part of Mrs. Mabel Powers and her piano students is an informal party each month at which time each child presents a selection for his fellows. And this is followed with a discussion of the number, its composer and so on into the fields of interest to the young students. The first one of these parties was held Monday night at the residence of Mrs. Powers. No parents were invited and everything was quite informal. After a discussion of the selections played of the life of Beethoven, and then some harmony work, refreshments were served and a happy evening came to a close.

The young students who were present were Sybil Spears, Alice Urub, Beverly Armstrong, Barbara Evans, Ann Tartar, Charlotte Eyre, Roberta Patton, Betty Abrams, Marguerite Clark, Celia Howard, Harriet Howard and Jack Powers.
