STOCK MARKET MARKING TIME

Call Money Drops to 4 Per Cent for First Time in Past Two Years

NEW YORK, Jan. 7.—(AP)—The stock market remained calm today, although call money sagged to 4 per cent for the first time in nearly two years. Share prices generally drifted lower, a few shares closing 2 to nearly 10 points off. Total sales aggregated but 2,029,290 shares, the smallest full day's turnover since August of 1928, save for the session preceding Christmas, when sales fell below 2,000,000.

Failure of the market to make any headway with call money going begging at 4 per cent was a striking commentary upon the speculative sentiment in the past few months.

Business and industrial news, however, was in general not of a character to enliven the bull crowd. Copper buying quieted down after the recent revival. Automobile news was disappointing. Studebaker earned its dividend by a rather narrow margin in the last fiscal year, and Franklin omitted the common dividend due at this time.

Steel mill operations were reported at about 60 per cent of capacity, having quickened only to the rate of mid-December, and most steel trade reports indicated that further acceleration would be gradual.

A strong and active feature of the market session was Radio Keith, which was bid up more than 2 points. Keith Albee, president, jumped 11. Sponsors of the stocks feel that the organization is in a position to show substantial earnings during the coming year. Although the reports were denied in authoritative quarters, it was rumored that Radio Keith might acquire Loews, as part of the reorganization of the Fox companies.
