"Contract awarded to the lowest bidder--"

When a corporation wishes to build a factory . . . when a city constructs a new subway . . . whenever a large undertaking of that nature is planned, the first step is almost invariably a request for bids on the work. This practice of competitive bidding has saved millions of dollars. It assures the city or corporation of getting the best value for every dollar spent.

The same system can be applied to your own buying. And

you can save a proportionate amount of money. How? Simply by consulting the advertising pages of this paper! When you find yourself in need of a vacuum cleaner, a refrigerator, a pair of shoes, a new suit-anything-don't rush out and buy the first one offered you. Exercise the power of

selection that the advertisements give you. Read about each one-what it will do, who makes it, what it costs. Then, when you find the one that best suits your needs and pocketbook, buy it! In this way you'll be spending your money wisely. You'll know what you're getting and how much it costsbefore you buy it.

> Every advertisement is the bid of some merchant for your trade; them carefully before buying
