# CARKIN TALKS TAXES SYSTEM

## Possibilities New Program Cited by Chairman of Commission

The state of Oregon faces greater accomplishments and a happier union within its borders through acceptance and careful building upon the taxation system now started. John Carkin, chairman of the state tax commission, said in speaking on taxation at the Zonta club luncheon meeting at the Marion yesterday.

In the 25 years preceding the last legislature's enactment of new tax laws and establishment of the full time tax commission, some 60 tax measures have been enacted by the people through the initiative and referendum. Carkin said. Reason that tax matters have fared so badly in Oregon is due largely to the fact that taxes can't be put into a straight jacket, nor is taxation a thing that can be rushed into without careful study, the tax expert declared.

The present state taxes, the tax on corporation and banks, the intangibles and the provision for equalization of property assessments, are believed by Carkin to be the beginning of a program which will put Oregon ahead in the field of taxation as a measure of development, no less than the road program worked out over the last 10 or 12 years has put the state ahead of all others in that advancement.

The new taxes have been thoroughly investigated and are of such character that they will build up Oregon, Carkin believes. The intangibles, excise or personal income tax, if accepted, do not duplicate each other in any phase. Carkin said especially that the excise tax, which is the only one through which banks can be taxed, should be continued by the state.

**Bed Found Needed for Charity Work**

Appeal is made by the Associated Charities for at least one bed, which is needed in a home where there are nine people and only two beds. Two of the seven children are sick, which makes the paucity of beds particularly hard. Mrs. Mae Young, Charities secretary, says she is especially desirous of getting in touch with anyone who might have an extra bed and mattress, or either, which could be spared, as the need is urgent.

Contributions received by the Charities yesterday included: William Galsdorf, \$2; Salem Malt shop, \$1; cash, \$1; C. H. Fike, \$5; M. C. Findley, \$5; William McGilchrist, \$5; Melvin Johnson, \$1; B. F. Pound, \$1; W. E. Anderson, \$1; James Brown, \$1; W. G. Krueger, \$1; R. H. Bailey, groceries, \$5; E. J. Dewnell, \$1; cash, 50 cents; Thos. D. Kay, \$10; cash, \$1; W. Cohen, \$1; Mrs. Charles C. Harris, \$1; A. T. Teaton, groceries, \$3.80; L. O. Clement, \$5; and a friend, \$1.

# State Board of Health Issues Warning Against Sinus Trouble This Week

Careful guard against sinus trouble may prevent chronic colds, points out the state board of health in its weekly bulletin issued yesterday. Says the state department:

Sinus trouble is a frequent cause of chronic colds, and the cause of much ill health and lowered vitality. The sinuses are small cavities or pockets in the face bones which connect with our nasal passages. The x-ray has tremendously increased the satisfactory diagnosis and treatment of sinus trouble.

Both right and left nasal cavities have connections with these hollow spaces in the bones, called accessory nasal sinuses. In the cheek bone, the sinus is large and is commonly called the "antrum," in the bone over each eye there is a smaller cavity called the frontal sinus. But a similar sinus, called the sphenoid sinus, exists behind each nasal cavity, deep in the base of the skull. Again, the narrowing of the nasal cavity at the top is due to a collection of rather thin-walled cavities which, collectively are called the ethmoid sinus.

It is easy to understand how an inflammation of the membranes lining the nasal cavity may swell the membranes about the small mouth of a sinus and thus cause it more or less temporary closure. Soon the lining of this sinus becomes inflamed and a profuse secretion is thrown into the sinus, at first clear fluid, but later changing to pus. If this fluid continues to collect, it may
