TAX DEDUCTIONS

A. A. A. Gives Regulations On Income Tax for

WASHINGTON, D. C., Feb. 15. -Deductions from the gross income allowed car owners under the regulations of the Bureau of Internal Revenue on account of automobile ownership and operation were outlined in a statement broadcast by the American Automobile association today.

First, the car owner may deduct from his gross income all sums paid during the calendar year in the form of registration fees, drivers' licenses, state personal property taxes and municipal

Second, the gaseline tax may be deducted in all cases where it is "consumers' tax" under the state law, but not where it is specifically enacted as a "distributors' tax."

Third, the interest on money borrowed for the purchase of an automobile is deductible, irrespective of whether the car is used for business purposes or for the bureau to mean more than his accounts on a cash basis such interest will be deductible only for the year in which paid. If accounts are kept on an accrued basis, interest may be deducted

Fourth, if a passenger car is used wholly for business purposes, all expenses incident to maintenance, including depreciation at the rate of 20 per cent per annum, may be deducted. Where the car is used "chiefly," or more than 50 per cent for business and incidentally for pleasure, the expense may be deducted on a pro rata basis.

Fifth, loss sustained by reason of damage to an automobile while being used for either business or pleasure is deductible. The loss, however, must be an actual loss to the person claiming the deduction. In other words, if it is compensated for by insurance or otherwise, it is not de-

Sixth, the bureau has ruled that where a motorist paid damages for injury to a pedestrian, such amount is deductible, provided at the time the injury occurred the car was being used for business. There has never been a decision, however, on whether a fine paid by a motorist might be deducted as a business exense, where, at the time the expense was incurred, the car was eing used for business or professional purposes.

Seventh, loss when sustained where an automobile used wholly or chiefly for business purposes is traded in for a new car may be

Eighth, the amount paid for insurance on automobiles used for business purposes and also the amount of finance charges on a purchased car which covers interest and risk on the loan, but not the amount covering the premium on insurance to protect the finance company's interest.

The national motoring body pointed out that the gasoline tax has been ruled a consumer's tax and therefore deductible in the following states: District of Columbia, Delaware, Georgia, Illinois, Kentucky, Maryland, Michigan, Massachusetts, Missouri, New Hampshire, North Carolina, Pennsylvania, Rhode Island, South Dakota, Virginia, Washington, Wisconsin, Kansas and New The A.A.A. says that in no

case is a loss deductible where it is sustained when an automobile used for pleasure is traded in for and when in Detroit she spends a new car. At the same time, it is much time visiting the children's amount paid for an automobile used for either business or pleas-ure allowed as a deduction. This is regarded by the bureau as a capital investment, but is subject to claim for depreciation when used for business purposes. In the case of purchase by a farmer for strictly farm use, only the ex-pense incident to operation is de-ductible, as in the case of any other business or professional use. How can a motorist determine the advantages set forth in the clause dealing with deduction of maintenance costs for cars used wholly for business? On this point the national motoring body

"When a passenger automobile is used primarily for professional is used primarily for professional or business purposes, and incidentally for pleasure, ordinary expenditures for maintenance and repairs may be prorated according to use, and deducted, provided the car is used 'chiefly' in the pursuit of a business or profession: 'Chiefly' is interpreted by since 1923.

Fleet of Model A's Added to Service

The Salem Laundry has renewed its fleet of delivery trucks, buying five Ford panel A delivery cars for its Salem pick-up and delivery service. The cars were purchased from the Valley Motor Company. The laundry is 100 Ford. The cars are neat and attractive.

pleasure. If the taxpayer keeps fifty per cent, If business constitutes a minor usage and pleasure the major part, the expense cannot be prorated or deducted. If the chief use is for business, the items of depreciation, gasoline, oil, repairs, chauffeur's salary, garage rent, as well as any other legitimate expenses, may be prorated according to the usage and the portion applicable to business purposes deducted."

By SUE McNAMARA (AP Feature Service Writer) WASHINGTON .- (AP) -- Margo Cousens, 19, heiress-daughter Senator James Couzens of Michigan, rebelled against the 'Debutantes' Union." She didn't care for parties or

big weddings, the usual debutante season aftermath, so she refused to make her debut. She startled society again by eloping with William J. Chewning, jr., young bank Now, on her honeymoon, she is

the most talked-of girl in the capital. Debbies, dutifully treading the prescribed social round, arrayed in "working uniform" of chiffons, jewels and flowers, gasp marvel and giggle. Some of them envy, some condemn. Margo frankly announced that

she eloped to avoid the strain of a big society wedding with its attendant parties. She pronounced the whole thing a "mess." Her ultimatum has stirred up a

lot of discussion. Each year the Washington social season takes such a toll of strength that some debutantes go to hospitals to re-

A mad whirl of parties every day lasting from one p. m. to three or four next morning makes up the average debutante's days

from November until April. Senator Couzens' daughter did not care much for evening clothes. Even at the fashionable Ball Boheme for which women donned their fanciest raiment Margo appeared in simple colonial costume.

She prefers horseback riding to teas. She likes social welfare work stated, that in no case is the hospitals. She was delighted with her father's gift of \$10,000,000

Miss Couzens is described by her friends as sincere, genuine and doing many kindly things in a quiet, indirect way. She is not extravagant, purchasing with good taste and discrimination.

She drives a modest make of car though her father's fortune is estimated at \$50,000,000. Like Florence Trumbull Coolidge she whether or not he is entitled to plans to live on her husband's salary, she says, and do her own

NEW SECRET FOUND OF PISTOL SILENCER

By HOWARD W. BLAKESLEE Science Editor

Associated Press Feature Service NEW YOLK (AP)-A bet that he could shoot a hole in a friends hat tossed into the air has led Maj. Henry B. Faber into an astonish-

ing scientific discovery. It was not ordinary pistol with which he proposed to drill the hat, but a military airplane signalling device, shaped litke a .45 auto-matic pistol, firing parachute flares instead of bullets.

Major Faber was a co-inventor of this device with Capt. L. L. Driggs, Jr., which explains the interest in the accuracy of hat shooting, a somewhat academic qualification for this kind of The flare pistol fires a short

blank shotgun shell, barely an nch long, which in turn projects the flare. Major Faber proposed to saw off the pistol barrel and load what was left with buckshot instead of a flare. The blank cartridge would propel the buckshot. Now, this cartridge explodes with a report audible for blocks around, so that it appeared certain at least that the noise would be worthy of the wrecking of sev-

Preparing for the bet, Major Faber sawed the barrel, and failing to find any buckshot, substituted some flashlight powder for general effect. He stepped outside the laboratory to try the results.

He pulled the trigger, but there was no loud report—nothing except a whispering "plop" that he could not identify. Thinking the primer was defective, he reloaded. Again the trigger snapped; but again there was no loud report, only the "plop."

The he examined both shells. To his astonishment both had been discharged, and without making a loud report. The hat shooting was forgotten in the excitement of the discovery.

It soon developed that flashlight cartridges are all lost noiseless when the barrels of these flare pistols are shortened to a certain length. Ballistic experts have advised

the major and Captain Driggs that they have stumbled upon a hitherto unknown method of silencing a

The discovery led to the development of a special pistol and flashlight cartridge for photography, which is claimed to have

State Game Warden Trying To Get Tule Lake Shooting

Wants California to Reciprocate With Oregon on Duck and Goose Hunting

California laws so as to permit bag geese. Oregon hunters to cross the line and take ducks and geese from Tule Lake. Recently the California officials unearthed an almost ancient law which prohibitis being made to enforce it, but were it rigidly enforced several thousand Oregon sportsmen would be banned from hunting in the Tule Lake district. It is estimated that \$30,000 of Oregon money goes annually into the California treasury for non-resident hunting licenses. Enforcement of the law would eliminate this sum from the California game protec-tion fund. Mr. Clifford has pointed out that if Oregon was in the mood to work a hardship on California sportsmen it could practically bar them from hunting in the Tule Lake district, as is almost necessary for them to come into Oregon before reaching the lake. It is expected that an adjustment will be made in the household of G. W. Ramsey 945 cars and trucks.

Efforts of Harold Clifford, so that neither the California state game warden are being di- hunters nor those of Oregon will rected towards the adjustment of be handicapped in their efforts to

Matt Ryck: ian, superintendent of hatcheries for the state game commission has returned to Portland after spending several days ed the exportation of game birds at the Cedar Creek hatchery in from their state. No great effort Tillamook county starting the planting of fish in the coast streams. During the next few days approximately one half million steelhead and cutthroat trout will be liberated in the Nehalem, Miami, Kilches, Wilson, Trask, Tillamook, Nestucca and other streams.

The work of planting these streams is being carried on under the supervision of Henry Helsel, chairman of the sportsman's organization of Tillamook county. It is now the policy of the game commission to be directed by the are made.

There should be no lack of food

of Estacada, for some time least. Last week he reported at cougar which he had killed in the Clackamas river district above Estacada. There he claimed a county bounty of \$120. Then he sent proof of his kills to the state game commission and collected an additional \$300 in bounties. Incidentally his work with gun and dogs saved Oregon approximately 600 deer, for a full grown cougar will kill an average of one deer a week.

More than one and one half million rainbow trout-some of them two years old-are now awaiting liberation from Delph creek hatchery. They will be planted in streams of Clackamas and adjacent counties as soon as the "Fish Pullman" is freed from its work of liberation in the coast streams.

Ford Production Third of Total

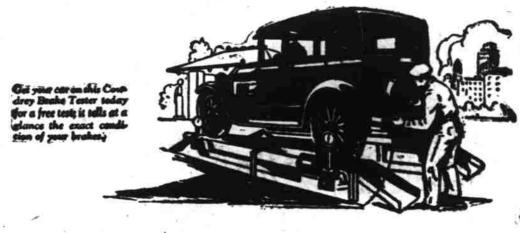

Nearly every third passenger car, truck and taxicab produced in the United States last year was a Ford. The industry as a whole desires of local sportsmen in each produced 5,358,361 units in 1929, county where plantings of fish according to official figures compiled by the United States chamber of commerce. Ford production in the United States was 1,709,-
