Bids Held Guess Work; Some Turn Soon Is Expected

HUBBARD, Mar. 3.-It was reported through the press Saturday that the Hubbard fruit pool was offered for sale on that day. Authorities here say that the report was mainly true except that no deal was completed and that the list of bids was principally guess work.

It is said that while the friendliest relations exist between Brooks, Woodburn and Hubbard and that helpful information has often been exchanged yet they have never talked of selling together, gentlemen's agreement or

otherwise.
Director's Gather The directors and officers of the association met Saturday and reported that a deal was expected to be completed soon but did not disclose the names of the buy-

Hubbard sold all of its soft strawberries to Reid-Murdoch earlier in the year but there is yet to dispose of 50 tons of Etterbergs; 95 acres of loganberries; three tons of gooseberries; 80 tons of blackberries and 20 tons of Royal Anne cherries.

Logan Outlook Dubious The loganberry outlook for the coming season is a little doubtful because of the extreme cold spell which caused about a 50 per cent loss to vines eccording to a recent survey of the local conditions. In most cases vines which did not touch the ground were frozen and killed. Some growers report a loss as high as 90 per cent of vines thus destroyed.

The blackberry vines seem to have suffered to the same extent as did the loganberries. As some of the growers said, "Just what was the result of the cold spell to the vines cannot be determined for several weeks yet."

# THE FIRE INSURANCE

# **AGENT** \_A Useful Factor In Every Community

In no other business does agent mean so much as in the fire insurance business as transacted by the Stock Companies. More than a century ago these companies established relations with property owners through responsible local representatives.

The system has grown with the insurance needs of the country. Today hundreds of the best citizens of every state are in contact with the public as representatives of the Stock Companies.

### **Great Authority**

In no other field is the relation between agent and principal more intimate. In no other activity is the agent entrusted with greater authority.

The Stock Fire Insurance agent has at his command all the facilities of the companies in engineering and research to make life and property safer. He has access to systematic hazard measurements; authentic information about proper building construction; the work of Underwriters' Laboratories in testing materials and devices, and other forms of service for the benefit of the insuring public.

### Leaders in Civic Affairs

In every community the insurance agents are leaders in civic affairs. They have been faithful factors in the steady reductions that have been made in the average rate charged for fire insurance during the last twenty years.

The local agent is in position to know his client and his client's property. He is prepared to study the needs of each onebrings to each the special service required -and may save you money if you will permit him to use the many available facilities and will cooperate with him in improving your risk.
