The First Year is the Hardest

TRESIDENT Hoover no doubt hopes that his first year will prov eto be the hardest. The going has indeed been rough for one who was elected by the largest vote ever given a presidential candidate. In dealing with Congress the president has had poor success, partly because of his policy of detachment, and partly because of the treachery of one who should have led the Hoover forces in the senate, Borah of Idaho. After campaigning diligently for the election of Mr. Hoover, Borah was one of the earliest to join in the guerilla warfare against him. This defection was inexcusable: for with perfect conscience and greater service to his country Borah might have become the leader of the Hoover bloc in the senate and made the administration a success in a legislative way as it is well on the road to becoming in an execu-

President Hoover started out briskly, giving a Roosevel-tian assertiveness that was refreshing. His stride has shortened as the year progressed, but Hoover is still the positive, Individual force in his administration. He will receive the credit and the blame for the farm relief bill which was passed at his behest and according to his wishes. He has kept aloof from the tariff controversy, unwisely we believe, for what the country and congress needed was a firmer "followup" leadership after proclaiming his formula of tariff revision in his first message.

So far as the administration of government affairs is concerned a new impulse has been felt throughout the federal establishment. Vigorous law enforcement, clean, incorruptible administration, constructive work for public welfare have characterized the Hoover administration. The appointment of numerous commissions has been for the purpose of fact-finding, in the belief that when the true facts are disclosed the remedy will be apparent.

The president's success in the field of foreign affairs has been gratifying, though not complete. He quickly established good relations with Premier MacDonald, restoring the republican party of Oregon better feeling between the United States and Great Britain was born. Last week reference after some rather irritating differences growing out of the was made to three of the first Geneva conference. The London parley, if it lives up to the Hoover ideal, will accomplish much for world peace and for for over 70 years on the Waldo for economic relief to the nations; but its final conclusions hills donation land claim of his pleasant for us on the steamer, where, I am told, the present are still uncertain.

President Hoover's appointments in the foreign field have been among the poorest he has made. The diplomatic Hunt, former Marion county my father during his trading ca- Just before we crossed South service has almost been wrecked by the type he has selected judge, who still owns the mile reer from eastern Indiana up the Platte river we saw our first buffor the important ambassadorial positions. The appointment square of land that made up that Mississippi to different places. of Mr. Johnson, minister to China, is the only one which occurs to us now which measures up to the high standards into Marion county, in the family of steamboats raced us all the way choice buffalo here, our hunters positions: England, France and Germany are in untrained and, we fear, in some respects, incompetent hands.

Mr. Hoover is succeeding as a good working president. He has not fulfilled the high hopes which were entertained perance Hunt, his wife, was born of the dawning of a new day, but he has gotten on about as ty, Harrison township, "Book of laugh came in afterward about well as any one could with the congressional menagerie he Remembrance of Marion County, the salmon books, as we found on his gun, and another cut the strap has to work with. We note editorial comment from friendly Oregon, Pioneers," by his daughsources still withholds final appraisal on his probable rating ter, Sarah Hunt Steeves, he immias president. The Yakima Republic says:

'He would be a courageous individual who would attempt to evaluate the period in its relation to the future."

And The Oregonian which sees the president working as an engineer on a long-time planning, admits:

One drawback to Hoover's prestige in the eyes of the people is

the fact that his methods and the magnitude of his undertakings per-

mit only few completed results in his first year." We are somewhat more inclined to think that the president is using the first year to find himself and to feel out the country. We shall be surprised if a man of his positive temper does not become more forceful as time goes on,

Filter Construction Should Proceed

WHILE the city council needs to protect the city's interest when it comes to vacating the alley for the new water company filter plant yet it would be a serious mistake to interpose vexatious delays on a project which has now company has been panned and razzed for not getting starthappily reached the stage of beginning construction. The ed. Now when it is ready to begin it should not be ham-pered and handicapped and irritated. An abundance of pure water for Salem is a necessity, and while we might get along with the temporary arrangements we now have, there is no reason to harrass the company in proceeding with the improvement which is necessary under any type of owner-

Nearly a year ago we urged the wisdom of the city's acquiring the plant and then putting in needed improvements. The city failed to act, so now the wise course is to let the filter plant be constructed by the water company. Perhaps it may cost the city more when it comes to taking the plant over-but that is the price of the city's continued delay and neglect; and a real indication of how it may be penalized in the future unless it proceeds as rapidly as the charter allows, toward the ultimate goal of municipal ownership of the water plant.

The Joseph-Mannix Findings

DENDING the final adjudication by the supreme court of the disbarment proceedings against George W. Joseph and Thomas Mannix, it is probably out of place for newspapers to comment upon the findings submitted by the referees who heard the testimony and arguments and have now submitted their report to the supreme court. The conclusions of the referees and the opinion issued in justifying their conclusions should satisfy the people of Oregon that the three judges who heard the cases: Skipworth, Norton and Wilson, have acted without fear or favor, determined to render impartial and adequate justice.

In the opinion there is no hedging, there is no compromise, there is no evidence of political audition. The referees handled what was regarded as a ticklish question fearlessly, but with open minds. Whether the supreme court will ratify their findings we do not know; but the state is indeed indebted to Judges Skipworth, Wilson and Norton for their painstaking and conscientious service in the settlement of one of the most complicated politico-legal issues that has been raised in Oregon's long history.

We don't make 'em all, Slips. For instance what about the car that was "completely emersed"? Evidently the C-J proof-reader

Answers to Health Queries V. N. Q.—How much should a girl 18 5 ft. 9 inches tall weigh?

is all that is needful.

Those of you who have slept out under the stars at night, in the woods, beside a tumbling stream, or on a mountain top, remember the wonderful sense of well-being and buoyancy upon getting up with the birds in the morning. You felt like chopping wood, or walking with seven-league boots, to the ends of the earth. 2.—How can I gain weight?
3.—At what age does a girl stop

pounds. 2.—Eat plenty of good nourishing food, including milk, eggs, fresh fruits and vegetables. Fractice deep breathing, exercise daily in the open air. Get plenty of rest and sleep.

R. T. V. Q .- What causes be

Adults should start early in the Fall to train the skin to react normally to different temperatures in the Winter months. Hot baths, followed by a cool shower, or cool baths taken in a warm room, promote better circulation in the skin. This helps to harden it to the cold. Mothers should take great care in the cold months in putting an infant out-of-doors to sleep, to see that the baby is kept warm. There are no limits, within reason, of course, to the coldness of air an infant may breathe without harm, if the baby is kept warm. A .- This may be due to ness decayed teeth or constipation.

3.-About 21.

T. J. D. Q.—What causes bunions?

A.—Bunions are caused pressure of the shoe on the the great toe and until this pressure cured. Wearing a broad will relieve the
