Goutre Not A Disease Milwaukee Doctor Makes Remarkable Discovery

MILWAUKEE, Wis.—It has been brought to light by scientific research that gout is not a disease and is not to be treated as such. Dr. A. A. Rock, Dept. E53, Box 737, Milwaukee, Wis., a prominent gout specialist for over 24 years, has perfected a different method of treatment for his patients that has proved remarkably successful. This same method is now being used at a home treatment of gout cases all over the country with astonishing results. The Doctor states that gout is a condition which grows worse with neglect and recommends immediate attention, no matter how small the growth may appear. He strongly opposes needless operations. Dr. Rock is the author of a book that tells in a simple way about treating gout at home. He has published and will send a copy free to anyone interested. Write him today—Ad.

Symptoms of Poor Vision

You should take occasion to carefully observe certain symptoms of eye strain, which will enable you to determine in some degree your visual condition.

CROPS OF STYES, INFLAMED LIDS—Styes are frequently caused by defective vision, also inflamed lids. These usually disappear when properly fitted glasses are worn.

HOLDING BOOK TOO CLOSE—This habit does not usually indicate nearsightedness but it does mean that the eyes are seriously defective. The object is held close in an effort to obtain a better view and this in turn means added eye strain.

POOR DISTANT VISION—This is self explanatory indicating the eyes are out of focus.

NERVOUSNESS, IRRITABILITY—Eye strain is a frequent cause of these troubles such as indigestion, dizziness, and other nervous symptoms.

CROSSED EYES—Glasses that are worn in time have been found to help and some times entirely correct this condition. Delay is dangerous and neglect often causes the devastating eye to become permanently blind.

SQUINTING—This abnormal action of the eyes is to shut out the glare of light which irritates weak eyes.

These enumerated symptoms of poor vision indicate urgent need for a thorough optometric examination which can only be given by a competent optometrist.
