> Is Your Child Immune **From Diptheria** Danger?

About Your Health

As we are approaching the season of diphtheria's greatest danger, it is well to ask whether or not your child is immune to that dread disease.

Toxin-antitoxin immunization can be provided by your physician with no danger and little discomfort to the child.

Its value and effectiveness can best be appreciated by the following figures given out by a leading life insurance company: "Coincident with the increasing use of

toxin-antitoxin since 1921, the diphtheria death rate among children insured in the Metropolitan declined from 23.8 per 100,000 in 1921 to 9.5 in 1926, a reduction of 60.1 per cent.

There are many ways in which your physician can help to protect your family health. Call on him promptly whenever trouble threatens and bring us your prescriptions.
