SOUGHT IN SEA

Divers Search for Alaskan Gold Believed Lost in 1901 With Ship

By BEN H. CONNER Associated Press Staff Writer

JUNEAU, Alaska. - (AP) - A modern version of "Twenty Thousand Leagues Under the Sea" is being enacted in treacherous Alaskan waters by a band of men from Olympia, Wash.

In specially devised deep sea diving apparatus these adventurers place their bopes of finding a fortune in gold believed to be somewhere in the sunken, barnscle-clad hulk that once was the crack Alaskan steamer Islander. The expedition, undaunted by

severity of weather and dangerous deeps of the sea, gradually is nearing the chimax of an attempt to retrieve gold dust and bullion from the sunken ship.

The Islander's sinking near Juneau in 1901 was a major tragedy of Alaska's wreek-strewn coast. Seventy-five lost their lives when the craft struck an iceberg.

Gold that may be worth miltions, members of the expedition believe, was left behind by panicstricken miners returning from claims staked in the heyday of the Yukon gold rush.

Carl H. Wiley, a sea-going me- enter cabins or lower decks. chanic of Olympia, devised the grotesque, egg-shaped diving bell the bell, allowing the diver to that is used to explore the sunken work more than an hour at a

BRADLEY, England (AP)-A carab taken from an ancient Egyptian tomb was blamed by Mrs. John Bertram Parkes for seven years of poverty and mis-fortune, culminating in widow-hood. So sheb uried the thing in the woods near her humble

The scarab was inscribed with part of the 64th chapter of the Egyptian Book of the Dead, which identified it with the heart of the deceased person and urged it not to betray him at the judgment before Osiris. It was found by her husband when he was Egypt as a colonel in England's crack Grenadier Guards.

Shortly afterwards, he was denobilized. For a time he worked first as a coal dealer and later as a market gardener, toy maker and firewood seller. Then for seven years he was unable to land job of any sort. Finally he was forced to build
