RIVERSIDE

Sold On Easy Terms

Guarantees Increased 12% to 50%

The purest rubber deteriorates in time. You have seen ordinary rubber bands grow hard and brittle. Formerly, even the finest tires deteriorated in the same way. Cracks occurred, allowing water to seep in which rotted the fabric and broke down the casing.

Now, in Ward tires, this tendency to crack and deteriorate prematurely has been virtually overcome! Ward tires are treated with "Anti-Oxidant" . . . a new chemical discovery which vitalizes rubber and keeps it young! Added strength and many miles of extra wear are built in. TWO YEARS of actual road tests have proven the benefits

of "Anti-Oxidant" so conclusively that we've increased the guarantees on all Ward Tires from 12% to 50%! In spite of this tremendous scientific improvement, not one penny has been added to Ward Tire prices.

And Remember This! In addition to the "Anti-Oxidant" Process, Riversides are made from the best materials by the highest skilled tire builders. They cost just as much to make as other fine tires, but they cost YOU less because our profit and selling cost are less . . . that's the only reason!

Try the new "Anti-Oxidant" Riversides on your car. Get them at Ward's TODAY.
