C. D. Stayton Is Injured In Accident

STAYTON, May 2.—Charles D. Stayton suffered a most painful injury on Monday. He was hauling a load of wood in a wagon which had high side boards, and was sitting on top of the load. As he drove into the wood shed at the A. E. Beedie home he noticed a beam, so "ducked" his head. He failed to notice a raise in ground of about a foot and as a result he was terribly crushed between the beam and the wood.

He managed with great effort to get off the wagon and lay there groaning and his groans were heard by Mrs. Felix Van Ermon who hurried to the scene from her home about two blocks away. She went to get help and someone to look after the team. Mr. Stayton managed to get to his home about three blocks away where he almost collapsed. He says he would not have believed that ones body could be crushed as his was and no bones broken. At this writing he is resting easily.

How Long Should a Wife Live?

was the subject of a talk by Bruce Barton, well-known author and advertising man.

The answer, in the old days, was "not very long."

Of interest to every woman is the following, taken from his talk:

"Do you know what happened to the Pilgrim Mothers? I will tell you. They died. They died young. It took two or three of them to bring up one family. The fathers were tough and lived long, but work and hardship made short work of the wives."

It has been truly said that you can measure the height of any civilization by the plane on which its women live. By that standard we have made great progress in the United States, but we have not made enough.

An electric motor which runs a washing machine or a vacuum cleaner works for a few cents an hour. There are still millions of women doing this work which motors can do—selling their time at coolie wages.
