When Fresh Peas are tasteless, you can improve their flavor as they cook by adding

a dash of Sugar

Don't blame the peas if they are flat. If you could have eaten them when fresh picked, they would have been sweet and juicy. But the longer peas are off the vines, the less sweet they are.

Other vegetables—carrots, spinach, cabbage and tomatoes—can also be made much more palatable by adding a dash of sugar while cooking.

And the same holds true in the preparation of stewed fruits, cooked cereals, meats, stews.

There is no need to deprive yourself of flavor and enjoyment when you sit down to the table. Use sugar for its flavor value in the wholesome foods that belong in your diet and each meal will be a pleasant event. The Sugar Institute.
