Entry Blanks Available For Ambitious and Air Minded Glider Builders

Through cooperation between The Oregon Statesman, the Fox Elsinore theatre, Claude A. Grimm glider schools and the Eyerly Aircraft corporation, boys and girls of Salem and vicinity are provided an opportunity to engage in an airplane and glider model construction contest with attractive prizes offered to the winners.

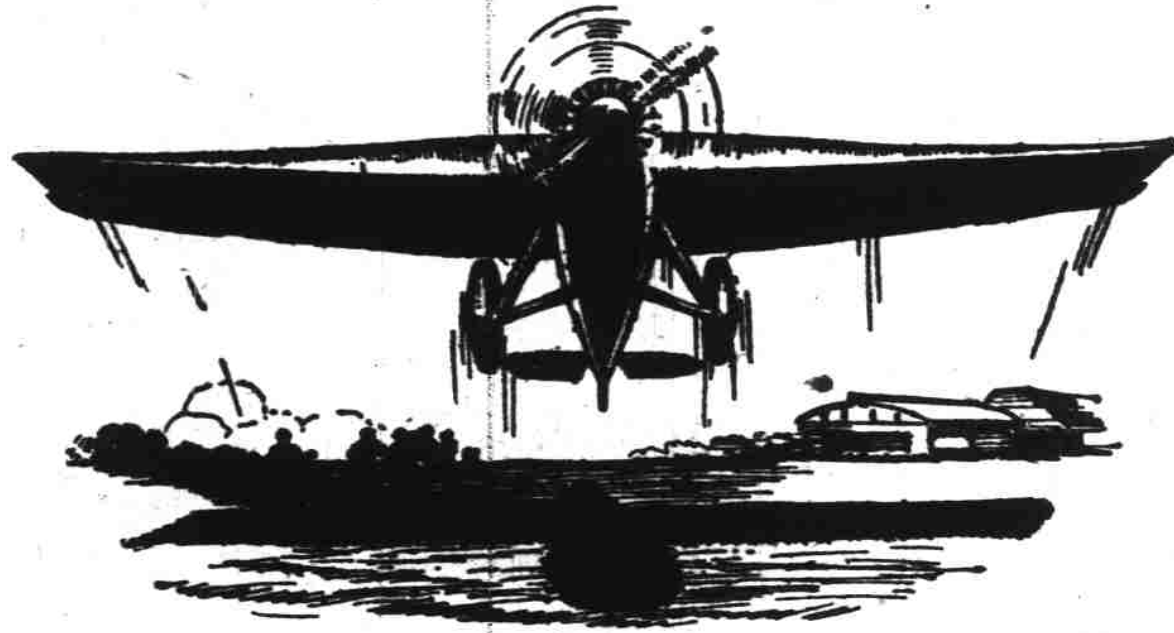

The rules are as follows:

1. This contest is open to all boys and girls under 18 years.
2. Work must be done by the exhibitor alone. No commercial knock-down sets admissible.
3. Fill out entry blanks which may be obtained at the Miller Mercantile company store, Harry W. Scott's cycle shop, Lloyd A. Lee Poultry

farm, Buster Brown shoe store, Imperial Furniture company store or Dan Burns auto parts store. Mail to Contest Editor, care Statesman, Entries close June 1.

4. Exhibits must be delivered to the Fox Elsinore theatre for exhibit on or before June 28. Winners will be announced July 4.

Information which will help the air minded and mechanically minded young folk in their work for this contest may be obtained from aviation magazines or Popular Mechanics. Claude A. Grimm of the glider school or Lee Eyerly of the Eyerly Airport corporation will be glad to help the contestants by answering any questions. Mr. Grimm's flying school is now located on the hill west of Schindler's dance hall, and his local address is 1515 North 20th street.

Classes in which competition has been arranged, and the prizes in each class are as follows:

Class: Airplanes, flying model.

First Prize: Free glider course, Claude Grimm.

Second Prize: Bronze Aviation Medal, The Oregon Statesman.

Third Prize: Month Pass, Fox Elsinore theatre.

Fourth Prize: Ribbon.

Note: Additional prizes may be announced later.

U. S. OF EUROPE AGAIN STUDIED

Plan Given Memorandum by European Nations Concerned in Idea

PARIS, May 17—(AP)—Foreign Minister Briand's conception of a future "United States of Europe" or "European federal union" as the proposed organization is more generally called, today was given in a memorandum to the 26 European states concerned with France in the plan.

The proposed European federal union, most ambitious project which has been considered since the setting up of the League of Nations, will be far from the close union such as exists among the United States of America according to M. Briand's memorandum. There will even be little similarity between the two groups since the most that is suggested from the European union is a type of regular conferences, without charter or constitution.

The foremost practical questions such a union might deal with in Briand's conception are economic and comprise eventual efforts to lower customs duties of European states among themselves.

The success of the union rests upon a "European conference" and a "European committee." The first would be a sort of deliberative body charged with study of European interstate problems. The second would correspond somewhat to the council of the League of Nations it would be the executive instrument of the union.

Briand purposely limited his suggestions, given out at the foreign office today to elementary details. He suggests that certain questions make closer coordination of European states necessary. He points out that new economic problems including customs matters, arose from addition of about 12,000 miles of frontier to the nations of Europe. He suggests that the European union could give attention to this important situation.

He reiterates his fealty to the League of Nations by stressing that, the proposed federal union can succeed only if organized in liaison with the League. He suggests that its divisions meet simultaneously with League bodies. The Briand memorandum proposes that the "European conference" be held at Geneva and that meetings of the "European committee" coincide in time and place with League council meetings.

Briand starts out with the fundamental principle that political considerations must be ironed out before economic questions can be handled by the centralized advisers.

Reaching the stage of practical application of the idea he goes into some detail, suggesting that the first question that might be taken up is the effective realization in Europe of the program outlined by the last economic conference of the League dealing with tariffs between members of the federation.

But One Couple Decides to Wed Here Yesterday

Only one marriage license was issued Saturday by County Clerk Boyer, election appearing to occupy the center of the court house stage throughout the day.

August W. Kloer obtained permission to wed Peggy Florey, Kloer, who is 32 years old, lives at 1126 8th street, Oregon City, while his bride lives at 223 17th street, Portland.

One young lad applied for a marriage license only to discover that more than 10 days had elapsed since he secured his marriage license. He was sent post-haste to the examining doctor to have a new certificate prepared, thus complying with the law that the certificate shall bear a date not more than 10 days prior to the license.

SELECTION DELAYED OF DIRIGIBLE BASE

WASHINGTON, May 17—(AP)—Chairman Britten of the house naval committee said today that in view of the controversy over the selection of the site on the west coast for the proposed \$5,000,000 naval dirigible base, the probable would be many months before the matter was decided.

Evidence presented the last four days at hearings before the committee on bills to authorize the secretary of the navy to accept sites at Sunnyvale, near San Francisco bay and Camp Kearney and near San Diego, he said, had convinced him that a most thorough investigation was necessary.

"The location of the site," Britten said, "may have a great deal to do with the naval policy on the Pacific coast in the future. The naval committee will inspect the sites probably in June to study their qualifications. It undoubtedly will require some time for the committee to reach its conclusions as to which of the two will be of the best interest to the military preparedness of the country."

MEMBER OF AEROPLANE GLIDER CONTEST

Learn how to fly quickly, safely and economically. A complete flying course for every one. The only Glider School in the Northwest. We use the famous Oakland and Pontiac cars for dependable service. They have the snap and performance you like.

Make Salem the Leading City in Aviation

His Latest Recreation

King Leon of the Lee Poultry Farms will this afternoon take up the latest thing in aviation when he takes off with Claude A. Grimm in his initial glider flight.

King Leon has an enviable reputation behind him. He is the son of an imported show winner with many blue ribbons and winnings to his credit. His son "The Prince of Wales" was Champion of the English class at the Pacific International Livestock Exposition last year.

Among Leon's outstanding accomplishments are his numerous broadcasting appearances, his flying trip from Portland to Seattle by plane, his membership in the Root Owls and his many show winnings.
