A FAMOUS NAME A FEWER CARS

Performance... YES!

because its engine is the biggest in any six of its price

Powered by the largest engine in any six of its price, the Pontiac Big Six is a big car in fact as well as in name. Sustained high speeds—swift acceleration—hill climbing... all are accomplished with surprising smoothness and ease. This is because Pontiac's big, 200-cubic-inch engine develops its maximum power at a very moderate engine speed.

Oil under high pressure lubricates vital moving parts of the big Pontiac engine. In addition, the Harmonic Balancer and rubber mountings increase still further the delightful smoothness and silence of the Pontiac power plant.

All these features help to make Pontiac's performance exceptional for such an inexpensive car. Drive the Pontiac Big Six for 30 minutes and you will appreciate what fine performance you can enjoy at low cost!
