24,000 MILES IN A YEAR

... and the only expense was 75c for a shock absorber link and 50c for a new rubber for the windshield wiper

ENTHUSIASTIC letters about the Ford car arrive daily from every part of the world. The following is typical of a great number received.

"Just a word regarding our experience with the Model A Ford.

"We purchased the car January 7, 1929. In the first twelve months it was driven more than twenty-four thousand miles over all kinds of roads and in all kinds of weather, from the nearly impassable roads we had in the spring of 1929 through burning heat. Also through the heaviest of rain-storms where many cars were dead and had to sit on

the roadside until they were dried out and pulled in, and through deep snow.

"The valves were ground at twenty thousand miles and apparently the car was running perfectly at that time, but some of the service men thought it would be advisable to grind them. Inspection of the motor at that time showed it to be in perfect condition.

"The only expense we have had is 75c for a shock absorber link and 50c for a new rubber for the windshield wiper.

"The car has given an average better than twenty miles to the gallon of gas. We are well pleased with the performance of the Model A Ford car and believe it is the most economical car there is on the market."

Thousands of other Ford owners report the same satisfactory service and economy of operation and up-keep. In comfort, safety, speed, power, beauty, reliability—in everything that goes to make a good automobile—the new Ford is a value far above the price you pay.
