Production Moneys for Cotton and Livestock Now Are Considered

Drought Emphasizes Need; Williams Makes His Report Today

By FRANK I. WELLER WASHINGTON, Aug. 6. The possibility of "production credit" for cotton and livestock. through emergency interpretation of the agricultural marketing act drew the attention of investigators today as President Hoover and his cabinet surveyed relief measures for drought-stricken areas of

Fresh reports of depleted feed and water-and even human food -supplies indicated drought damage, continuing unabated in almost all sections, might run high into the millions of dollars. A report on avenues open to

the farm board for getting production credit into the hands of the farmer was to be made public tomorrow by Carl Williams, member representing cotion. Funds to Feed Stock

Will Be Talked Over Williams was expected to discuss in particular the possibility of providing funds to feed livestock through the national feeder and finance corporation, a subsidiary of national livestock marketing association.

As the livestock set-up was interpreted, the board would lend money to the marketing associa-tion which in turn would lend it to the feeder and finance corporation for distribution to regional credit associations operating in federal intermediate credit bank

The federal money would be used to acquire the capital stock of the regional credit groups which would be authorized to discount mediate credit banks. The process would permit the pyramiding of into \$50,000,000 of credit. Most of the cash loaned to farmers would intendents, at the closing session

Stock to Be Used As Feed Collateral The effect of the plan if the

board finds authority for it, would be to enable the farmer to put up his livestock as collateral and borrow money to buy feed. He would be obligated to market his stock through the national livestock marketing association. It was the original aim of the

feeder and fiance corporation to pave the way for the feeder who wished to borrow money for the purchase of livestock. Production credit is provided

for in the set-up of the American cotton cooperative association. Williams was expected to outline so damaged by the drought he will | county .. have to seek aid in financing his 1931 crops.

ture, approximating flood and tornado relief, continued to pour in to the president and governmental agencies. No action was anticipated before Monday when the president was to be given detailed report of drought damage by the department of agriculture. Secretary Hyde, enroute to Washington confer with Mr. Hoov r upon his return tomorrow.

Buyers Frantic as Wheat Goes up 6; Corn Jumps Higher

CHICAGO, Aug. 6.—(AP)
— Something like the spirit

of yesterday came back to the grain pits today. The plague of drought in the cornfields and rust in the Canadian wheat lands, brought traders fighting for elbow room in the board of trade pits to bid for wheat and corn with a fervor not seen in months.

Wheat whose value had bed in recent months until it sold a week ago at 83 3-8 cents a bushel, the lowest in 16 years, spuried up 5 to 6 1-8 cents from yesterday's close and was 12 cents above the record low. Corn kept ding 6 7-8 to 7 7-8 cents a bushel to its worth and sell-ing at 4 1/2 cents better than

Frantic traders shouted themselves hourse trying to execute buying orders.

POWER U. S. WORK

PORTLAND, Ore., Aug. 6-(AP)-Phil Metschan, republican candidate for governor, in a statement issued today said Oregon and Washington should without delay urge the federal devel-opment of the Umatilla Rapids power project.

Metschan said if he were elected governor he would urge the legislature to enter into an agreement with Washington for division of the power and water and would recommend a delegation be sent to Washington, D. C., to work for an appropriation for the project.

Metschan pointed out development by the state would treble taxes and held it should be undertaken by the federal government under the same conditions that it is building the boulder

Fight Begins to Win SILVERTON IS Garbage Right; Plant TITIFWINNER To Make By-Products

Communities Service Co. Wants to Handle All Refuse in City and Take 10 Per Cent Royalty

By JOHN NELSON

A three-way fight for the establishment of a sewage Northwest Victory to plant has come to light here with the visit Wednesday night of Philip S. Gregory, vice president of the Communities Chemical Service corporation, of Seattle.

Two private interests are already interested in the plan, while the city of Salem may enlist itself into the fight. L. J. Simeral, superintendent of the city incinerator, will leave this morning for Seattle where he will attend a demonstration of the commercial "destructive garbage disposal" plan. Gregory will accompany him.

The plan outlined by Gregory

calls for the building of a gar-

bage disposal plant which, in-

stead of costing several thousand

dollars a year to run, will turn
