Lamkin - Peters Nuptials Told

MEYER WILL HEAD FEDERAL RESERVE

WASHINGTON, Sept. 4.—(AP)—Early reorganization of the federal reserve board will be made with Eugene Meyer, a veteran government financial administrator, taking over the governorship.

Edmund Platt of New York, the vice governor, is retiring shortly and his departure clears the way for appointment of Meyer who comes from the same federal reserve district.

With Platt's retirement both the governorship and vice governorship of the board will be vacant, Roy A. Young having resigned as governor recently to become head of the Boston federal reserve bank.

President Hoover intends to name Meyer governor. He is looking for a vice governor and there are indications he will go to the northwest to fill this office.

Appointment of Meyer would have been impossible had not Platt resigned because the law stipulates that not more than one member of the board shall come from the same federal reserve district. Meyer also is a resident of New York.

LICENSE NOT GIVEN IN COPCO PROJECT

Rhea Luper, state engineer, Thursday received a letter from the federal power commission at Washington to the effect that the license to the California-Oregon power company for rights of way along the Klamath river has not been granted as indicated in recent press reports.

The federal power commission explained that the license has been drafted and is now awaiting further disposition. Even though the license was issued it would not be effective until such time as the water power appropriations are granted by the state.

The power company, in its applications filed with both the state and the federal power commission, sought the development of water power at seven sites along the Klamath river between what is known as the Grant site and the California line.

Luper, in a statement issued a week ago, said that no more important water applications would be granted until after the regular legislative session in January.

This statement was issued by Luper in connection with demands for a special session of the legislature to consider the enactment of laws which would withdraw from appropriation all of the important water power sites in Oregon.

The Oregon-California Power company also has filed on the waters of the North Umpqua river and Clearwater Lake in Douglas county, but no action has been taken on these applications.

Luper declared Thursday that he was not surprised at the information received from the federal power commission, for the reason

that it has not been the practice of the government to issue licenses until after the water appropriations have been authorized by the state.
