Honey Movement To Market Said Nearing its end

The movement of new honey to market from local districts is practically over at the lower elevations, but is still on heavy at high elevations. Crops are generally irregular, but still average around normal. Extracting of new crop fireweed honey has not been actively started but some beekeepers have taken off small quantities for immediate needs.

Reports from east of the Cascades are to the effect that considerable honey is still being stored in favored sections, with the total crop up to or above that of last year. Prospects are not favorable from the third crop of alfalfa. Damage from spray poisoning is less than usual this year.

All Statesman carriers are little merchants and charged for the papers delivered by them. Failure of a subscriber to pay is a loss to the carrier.

for each year and the term of years for which lease is desired, and shall be accompanied by certified check for 10% of the amount of the bid for one year and by map in triplicate, showing premises and ownership of abutting property and residence and P. O. address of such owner or owners.

The Board reserves the right to reject any and all bids, whether before or after the award, or if the bidder refuses or shall fail or neglect to execute the contract and furnish the bond specified or required by the Board, and reserves the right to lease the whole of the above described premises, or any portion thereof, and the riparian owner, his assigns or representatives, subject to rules and regulations adopted and promulgated by the State Land Board, will be given the preference right to lease at the highest price offered, said right to be exercised within five days after the opening of bids.

Chicago Grain

CHICAGO, Sept. 10—(AP)—Grain trade today was largely a balancing affair. Traders reduced commitments in preparation for the United States government crop report, due late in the day.

Wheat had a better undertone and prices averaged higher, although most of the trading was done within narrow limits. Final estimates of the amount of export business done overnight were 500,000 bushels. Strength of wheat at Liverpool, with the October delivery selling at a premium over the December and March deliveries for the first time in several years, helped the Chicago market. Corn met with selling pressure towards the end of trading and sagged some.

Closing prices on wheat were nervous -8-1c higher than yesterday's finish. Corn closed unsettled, from 1-8c lower to 1-4c higher, and oats 1-8-¼c up.
