BEAUTIFUL and CHARMING! It's an added special quality that makes the beauty of a pretty girl. But she's a natural favorite to begin with. And for the same reason Camels are favorites with the modern crowd. Scientific principles govern their manufacture; but the mildness, the fragrance, the delicate flavor are natural qualities of the tobacco. There's enjoyment in the smoking of a Camel. Camels go with happy faces... a lift of spirits with the opening of every fresh, fragrant pack. For Camel's delightful mildness holds all the natural goodness of choicest tobaccos. Don't confuse it with the flatness or insipidness of "over-treated" cigarettes.
