WHY are Camels welcomed with cheers in any company—a twosome or a crowd? Because they're mild—not flat or tasteless but naturally mild. They have the marvelous aroma that only choice tobaccos, mel- lowed by golden sunshine, then expertly cured and superbly blended, can give a cigarette. There's nothing artificial about this delightful fragrance. No doctoring, no over-processing can produce it. Camel's refreshing mildness is there from the start.

Swing with the crowd to Camels. Learn the happy difference between true mildness and insipid flatness. Smoke without fear of throat-discomfort or after-taste—just for pleasure!
