

FERRY OUTLINES BASIS FOR CRIME

Great Increase in Crime of Women Accompanies 'New Freedom'

Martin Ferrey talking to Rotarians yesterday on the "Psychology of Crime" compressed in a short space of time the substance of extended studies which he has made in this particular field. He first divided criminals into several classes. There is the born criminal, a victim of atavistic tendencies, who is born into an environment he is alien to. There are the criminals of passion, who are swept by sudden gusts of emotion which have been ingrained through millions of years of heredity, and which bursts the controls of intelligence and reason and commits a crime. There are occasional criminals, who fall to the temptation of the present age with its emphasis on luxury and acquisitiveness, and there are the criminals by habit.

Dr. Ferrey reported that there had been a great increase in crime by women, accompanying the new freedom which women enjoy. The problems of control are serious. The sanctions of religion are losing their influence. A generation of youth is growing up not conscious of moral values. There is a growing disregard for public opinion which always has served as a form of restraint. Education emphasizes materialism, and becomes a tool for the bad as well as the good. Many highly intelligent people become professional criminals. Without tendency toward self-expression we have not developed a corresponding power to inhibit and control. Lack of discipline is a great cause for the commission of crime.

Dr. E. F. Ford was introduced as a new member.

COURT FAVORABLE TO LABOR PAPER

The state supreme court Tuesday modified the decree of Judge Jacob Kanzer of the Multnomah county circuit court in a suit brought by E. M. Crouch to enjoin the Central Labor Council of Portland from picketing his two restaurants.

In the course of picketing it was alleged by plaintiff that persons employed by the central labor council displayed copies of the Oregon Labor Press on which were printed in large black letters "Crouch Employees Work Seven Days a Week" and other similar headlines.

The facts in the suit were stipulated by the opposing attorneys, with the result that upon motion of the attorney for the plaintiff judgment was entered in his favor upon the pleadings. The defendant central labor council then appealed to the state supreme court.

Under the decree of the lower court the defendants were prohibited from adopting any means whatever to divert attention from the plaintiff's business. His premises, the injunction also prohibited the defendants from exhibition of the Oregon Labor Press in or near plaintiff's restaurants containing any reference to plaintiff or to his restaurants.

In modifying the decree of Judge Kanzer the supreme court held that in denying the defendants the privilege of displaying in front of the plaintiff's restaurants a copy of the Oregon Labor Press containing any reference to plaintiff or his places of business, would be a violation of the constitutional provisions granting to the Oregon Labor Press and all other publications, the right of free expression of its opinions.

CHANGE PROPOSED TO CURB CINDERS

A cinder eliminator which would wash cinders from the air rather than fan them through a cone is being considered by the Oregon Pulp and Paper company which is under bond to provide adequate means of handling the cinder nuisance within four months from October, 1930, when a portion of Trade street was vacated to the mill.

Walter E. Keyes, attorney for the mill, says that the elimination proposed has been tried out with very satisfactory results by the Portland General Electric company. He regards it as a development over the cone cinder remover.

Keyes believes that the substitution of the improved type of remover would call for council permission as the bond is written to require a cinder cone.

The cost of the cinder eliminator which washes the cinders from the air and the cone which takes them out by suction, is said to be about the same.

Trindle said anyone who wanted to verify this statement should take to the air and see for himself.

ARGENTINE CUT RISES GRAIN PRICE BUTTER, EGGS STAY AT SAME-MARK

200,000,000 Bushels May Be Fed to Hogs, Stock

CHICAGO, Nov. 26.—(AP)—Affected by the big shrinkage of crop yields in Argentina, wheat prices showed an upward trend most of the time today. Authoritative unofficial estimates indicated 19,000,000 bushels less Argentine wheat in sight for export than recently forecast. On the other hand, European purchases during the last 24 hours were figured as totaling as much as 1,750,000 bushels, and the aggregate of probable feeding of domestic wheat to live stock this season was predicted in excess of 190,000,000 bushels.

Closing quotations on wheat were steady, 1-1/4 cts off to 5-8c up, compared with yesterday's finish. Corn closed unchanged to 1/4c higher, with oats at 1-8c decline to 1/4c advance.

General Markets

PORTLAND, Ore., Nov. 26.—(AP)—Produce exchange, not prices: butter, extra 25, standard 21, prime firsts 20, 25c; eggs: fresh extras 25, fresh mediums 25.

Fruits, Vegetables

PORTLAND, Ore., Nov. 26.—(AP)—Fruit and vegetables—Fresh fruit—Apples, 10@12; peaches, 10@12; pears, 10@12; plums, 10@12; cherries, 10@12; grapes, 10@12; berries, 10@12; citrus fruit, 10@12; melons, 10@12; watermelons, 10@12; pumpkins, 10@12; squash, 10@12; cucumbers, 10@12; eggplants, 10@12; okra, 10@12; green beans, 10@12; lima beans, 10@12; kidney beans, 10@12; pinto beans, 10@12; chickpeas, 10@12; lentils, 10@12;
