Silverton Lauded as Community Where Folks are Friendly

"Valley is Garden Spot of World", Holds man of State Chamber

SILVERTON, Dec. 18 — "You will find no friendlier community than Silverton," said E. G. Harlan of the state chamber of commerce when he spoke Wednesday night at the annual dinner which the Silverton chamber gives those who have arrived at Silverton during the past year to make

Harlan talked on Oregon as a whole, but laying particular stress on the Willamette valley which he refered to as "the garden spot of the world." He supplied sufficient concrete examples to give weight to his statements.

"Out of the 16 world record Jerseys, Oregon has produced six and Oregon has but a small percentage of the world's Jerseys,' he cited.

In eastern cities Oregon apples are being sold on the streets to relieve the unemployment situa-This year 4900 carloads of pears have been shipped from Medford and 4000 carloads of apples from Hood River thus far. Oregon's entire walnut crop was sold this year when harvested. Last years 40 million pounds of walnuts and 15 million of filberts were imported to the United States. Oregon is well situated to cut down the neccessity for this importation.

Many Records Held "Oregon has established many world's records in breeding of dairy stock and production of quality dairy products. California will import 40 million pounds in 1931. Idaho ships about 4 times as much to California as Oregon. Eighty per cent of Tillamook's cheese goes to Califor-

"In poultry, Oregon also holds world's records. Oregon had the first hen to lay 300 eggs in a year. In 1925-1929, Hansen of Corvallis won the International Egg Laying Contest."

The annual dinner for the newcommers was served at the armory by the ladies of the Methodist church. A short program was given during the dinner hour. This consisted of a dance by a group of Miss Violet Ramsby's pupils of North Howell; vocal solos by Mrs. Alvin Legard with Peggy Goplerud at the piano; a reading by Robert Drake; a group of instrumental selections by Rudd Bentson on the harmonica, Frank Coffman on the guitar and Mrs. Ed Holden at the piano. Mrs. John T. Hoblitt acted as chairman of the program committee.

Following this the newcomers were introduced by Alfred O. Nelson, chairman of the arrangements, and following this the chamber of commerce members were introduced to the newcom-

Four factors, Mr. Nelson said were always taken into consideration when a new location for a home was sought. These were, according to Nelson, health, prosperity, education, and the social

Dr. R. E. Kleinsorge, chairman of the Silverton school board, spoke on the educational system of Silverton. "This community," he said, "has arisen to its responsibility in furnishing a system that meets every requirement." He referred to the grade school building at Silverton as "second to none in the state." The school plant at Silverton, he pointed out, represents an investment of over \$200,000, that the schools are run on a cash basis with a sinking fund for debt retfrement. The school system, he indicated, was of value next in importance to health. "Our crop of children is our most valuable crop and it never fails," he said.

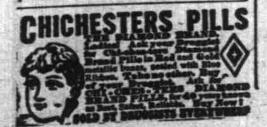

M. G. Gunderson reporting on the poultry show which the chamber of commerce sponsored in November, said that Mr. Brew-ster, who judged the show, remarked that it was the best show he seen in Oregon outside of the state fair and the Portland expo-

Norris Ames, president of the chamber of commerce, reported on the hotel committee, saying that after the first of the year the chamber would take up the Hockenbury Hotel System survey seriously and try to float sufficient funds to build a hotel here. Alf O. Nelson reported on the

automobile camp situation, saying that Lester Whitlock, who has just constructed a new service station here, would now build a camp if he were sure the chamber of commerce was 100 per cent be-hind him. A vote was taken showing the group endorsed Mr.

Whitlock's move. E. Garver reported briefly on the electric light plant commit-tee. Figures and facts, he said were being obtained and would be fully given at the next meeting. At present the committee was figuring on a plan which would include the purchase of the distributing system of the present power company if it could be arranged to buy the "juice" from that company or some other. In the committee's opinion such a plant could be paid for in five years at the end of which time Silverton would then own its own light company.

Mayor Eastman spoke briefly on the work of the welfare bureau at Silverton, reporting that he did not believe the committee in charge would have any trouble in carrying on the work as planned for the winter. Every
