BABY CLOTHES IN DEMAND, IS WORD

The Auxiliary to the Patriarchs Militant will meet for regular meeting Thursday evening at 8 o'clock in the I. O. O. F. hall and at this time officers for the coming year will be installed. Mrs. Louis King will preside and Robert Henderson will be the installing officer.

BABY CLOTHES IN DEMAND, IS WORD

Ensign Williams, of the Salvation Army, reports a great need for layettes and states that no less than four baby outfits were sent out from his office this last week. "We try to lay aside all such articles as they are donated so that we may be prepared for the needs as they arise," the Ensign stated, "but lately much more has been going out than has come in so that we are completely out of layettes."

"We will be buying material at once so that our sewing organization 'The Ladies Home League' of the Salvation Army may continue to make such articles, but often there are baby clothes laying around in people's attics unused which could just as well be doing some poor mothers some good," Williams says. The Army's phone number is 1820.

Free wheeling
—not the feature of a season but the future of an industry

INFORMED automotive engineers knew the whole future of the motor car was affected when Studebaker successfully introduced Free Wheeling with positive gear control on July 10, 1930.

These men recognized at once that Studebaker had solved a problem as old as motoring—the problem of controlling momentum and putting it to work.

They knew that Free Wheeling, as Studebaker offered it, went straight to the root of applied dynamics—giving the car that offered it a superiority which no car without it could contest.

That is why you are hearing so much more about Free Wheeling today than you did when Studebaker first introduced it. If all cars had it now, the public would save hundreds of millions of dollars in gasoline and oil expense every year.

Free Wheeling has brought Studebaker thoroughness and initiative into the limelight more conspicuously than ever.

Today every Studebaker gives you Free Wheeling. All cars will be aspiring to give it to you tomorrow. It gives you 10,000 miles of travel for 8,000 miles of engine effort—greatly reduced operation and maintenance cost—new safety—new ease of driving.

It means much that these cars come to you with the greatest engineering advancement since the electric starter. But it means even more that they bear the name of Studebaker, distinguished in transportation for more than half the lifetime of the American nation.

Studebaker cars are priced f. o. b. factory from \$795 to \$2600
