### SALEM HEIGHTS IS ON BEST LIST

SALEM HEIGHTS, March 10.—Recently a list of the 100 best sanitary schools in Marion county was published in one of the Salem papers. The Salem Heights school was not among those published. This district less than two years ago erected a strictly modern four room school. This being the case many residents of the district indignantly inquired of the school board why it was, that under those circumstances Salem Heights should not be listed as 100 per cent.

The board took the matter up with H. C. Sinks, health officer, and learned that any school with points of 80 or over according to the state law was a standard school, therefore sanitary. Salem Heights school had 97 points and Sinks in company with Dr. Craig, chairman of the board, inspected the school and pointed out a minor discrepancy which existed and which fully justified Mr. Sinks in deducting three points.

This minor condition has been overcome and Mr. Sinks states that he will now be able to file a new report listing Salem Heights' new school building at 100 per cent.

BRUSH CREEK, March 10.—Interest in the play, "Go Slow, Mary," which will be given on Thursday and Friday nights of this week is holding the attention of Brush Creekers and surrounding communities at the present time. The play is being directed by John C. Goplerud, who is employed at the First National bank at Silvertion, and it gives promise of being well done. The plot of the play is appropriately mixed up with a young husband out of a job and his disconcerted wife, Paris played by Mr. and Mrs. J. C. Larson. To make things worse, or better, the mother-in-law (Althea Meyers) arrives for a visit. Her two grandchildren, parts taken by Viola Larson and Sam Lorenson, are accompanying her and their antics—for they are not all that grandchildren should be—add much to the play. Elmer Grace does the part of an Englishman very well, and Ludwig Meyers and Margaret Giesek, playing the parts of Harry Stevens and Sally Carter, sweethearts, are very satisfactory as such. Luella Porland as Katie, the German maid; Martha Maurer as Danny Grub, the iceman; and Dan Hillman as Murphy, the Policeman, all do their bit to make things laughable.

There will be no school at Brush Creek for at least a part of Thursday afternoon as at that time arrangements will be made for stage settings and the seating of the people. Because a number of people will be unable to attend on these two nights it is understood that the play will be repeated again on March 20.

## FORD SMOOTHNESS

The new Ford has more than twenty ball and roller bearings

EVIDENCE of the high quality built into the new Ford is the extensive use of ball and roller bearings. There are more than twenty in all — an unusually large number. Each bearing is adequate in size and carefully selected for the work it has to do.

At some points in the Ford chassis you will find ball bearings. At others, roller bearings are used regardless of their higher cost. The deciding factor is the performance of the car.

The extensive use of ball and roller bearings in the new Ford insures smoother operation, saves gasoline, increases speed and power, gives quicker pick-up, decreases noise, and gives greater reliability and longer life to vital moving parts.

Other outstanding features that make the new Ford a value far above the price are the Triplex shatter-proof glass windshield, silent, fully enclosed four-wheel brakes, four Houdaille double-acting hydraulic shock absorbers, aluminum pistons, chrome silicon alloy valves, three-quarter floating rear axle, Rustless Steel, the extensive use of fine steel forgings, and unusual accuracy in manufacturing.

## "I've ridden the Western Plains

—says Chesterfield

### Yet you'll meet me in the thick of a Broadway crowd"

It's a far cry from the cow country to Broadway. But what it takes to make the broncho buster "open up" about his cigarette is exactly what you want in your smoke. Good taste—and lots of it! And that is first a matter of tobacco quality, never forget it! What you taste in Chesterfield is riper, better tobaccos—not another thing—blended and "cross-blended" to a fragrant, satisfying mildness that is Chesterfield's own!

Greater mildness  
... better taste!

FOR NINETEEN years, our Research Department has kept intimate touch with every new development of Science that could be applied to the manufacture of cigarettes. During this period there has been no development of tested value or importance to the smoker which we have not incorporated into the making of Chesterfield cigarettes.
