**Well-Ceiling Fire** — The central fire company was called to the A. L. Clearwater residence at 223 South Church street, at 4:30 o'clock Tuesday afternoon. A stovepipe was too near the wall paper, which caught fire. The blaze was extinguished with chemicals. Firemen gave the reason for several pieces of apparatus appearing on the streets as the fact that the fire was too near downtown to trust a single piece of apparatus in case the fire got out of control.

**Stockholders Gather Here On Morrow; Stock Trade Under Consideration**

Stockholders of the Oregon Linen mills are to meet tomorrow afternoon at the chamber of commerce rooms here to determine what course to take regarding pending reorganization of the firm.

Under a proposal recently made through F. J. Gilbrath, the company would be reorganized with one share of no-par common in a new concern being made for four shares of preferred stock in the present company. This preferred, which has not paid any dividends and whose book value has been greatly decreased by steady losses of the company, is widely held through Salem, the valley and in Portland.

Gilbrath has been in California for some time but is expected home for the meeting.

Considerable diversity of opinion exists among stockholders regarding the proper procedure. It has been suggested that an entirely new board of directors for the present company be chosen to replace the existing board, among which there has been some dissension in the past. At a stockholders meeting held last fall, three members of the general group of stockholders were chosen to sit with the board in determining on some policy for the company to pursue.

Objectors to the plan recently proposed for reorganization of the mill in new hands and with the issuance of new stock for old, point out that 1000 shares would go to the promoter for his work.

Proponents of the reorganization say that some action is necessary at once to provide new working capital for the concern to fund outstanding obligations. Interest on the \$150,000 bond issue, together with some principal, is due April 1.

**Well Driller is In Great Demand Due to Drought**

Every cloud has its silver lining so the old adage says and R. A. West, Salem well driller, says the present dry winter has certainly turned the silver side of its rainless clouds to him. He has had more wells to drill this past winter than any previous winter and there are still many wells ahead to be done.

The lack of rainfall has caused a large number of wells to become dry or to so nearly approach dryness that owners have called

**Make us prove this!**

You, too, can enjoy superlative performance with the new Philco. Its eleven-tube sensitivity and screen-grid power bring enjoyable programs to locations where other radios stand powerless and silent. Its improved superheterodyne selectivity cuts through aerial traffic jams and brings distant programs to locations where other radios get only nearby stations. It is without question the most powerful, sensitive and selective radio receiver on the market.

Four weeks ago we published this advertisement... telling how George Leonard, 203-A Randall St., San Francisco, heard Japanese and New York City stations with the Philco 11-tube Superheterodyne-PLUS in daytime.

It aroused nation-wide comment. Hundreds of personal inquiries, telephone calls, letters from all parts of the United States, have poured in since it was published. Many persons doubted that the radio would do what was said of it. Some of these doubters asked Mr. Leonard for
