Derby Not Appellant — F. N. Derby, administrator of the estate of T. W. Steiger, has filed affidavits with the court here to show that Guy O. He says in August, 1929, a petition asking the court to allow appeal was signed by Smith as attorney for defendant but that he, Derby, asked that this be changed to read Smith as attorney for the heirs instead of attorney for administrator. The matter wasn't changed, the affidavits say.

COUNTY SHOWS GAIN IN FARMS

Fewer Listed Than in 1925 But Acreage Greater; Average 82.9 Acres

Some results of the 1930 farm census in Marion county have just been released from the office of the director of the census in Washington, D. C., and show some interesting facts and comparisons.

In 1930 there were 4,821 farms in the county, 12 less than in 1925 and 1,140 more than in 1920. The total acreage as of the last census was 399,563, compared to 386,234 in 1925 and 267,788 in 1920. Last year the farms average 82.9 acres, as against 79.3 in 1925 and 99.9 in 1920.

Farm on the last census showed a valuation of \$50,909,930, of which \$39,055,950 was for land alone, \$11,853,980 for buildings and \$8,072,352 for farm dwellings alone. Implements and machinery are valued at \$2,672,352 and the average value of land and buildings per acre is \$127.41. Virtually all these figures show increases over the other years.

Most Of Farms in 1930, 3.921 are operated by owners, 102 by managers and 798 by tenants. Owners operate 299,979 acres valued at \$38,932,941; managers operate 21,194 acres worth \$3,321,634; and tenants handle 78,390 acres worth \$8,056,355.

There are 65 farms under three acres; 774 under nine acres; 729 under 19 acres; 1,110 from 30 to 49 acres; 907 from 50 to 99 acres; 668 from 100 to 170 acres; 269 from 175 to 289 acres; 235 from 290 to 499 acres; 235 from 500 to 999 acres and 13 over 1,000 acres.

Horses decreased from 10,073 in 1920 to 7,063 in 1930; mules on farms increased from 185 in 1920 to 253 in 1930; cattle increased in the 10 year period from 21,376 to 23,451. Hogs decreased from 21,906 in 1920 to 11,086 in 1930 and chickens increased 26,000 to 257,831 in 1930.

The census shows the crop harvest in 1929 as follows: corn harvested for grain, 5,257 bu.; oats thrashed for grain, 35,406 bu.; wheat, 20,126; hay, 37,198 tons; corn cut for silage, 5,011 tons; potatoes, 3,957 bushels. All show an increase over 1924 except potatoes, hay, wheat and oats.
