Importation Reduction Pleasing Factor in U. S. Report

One of the principal points of encouragement in the 1930 wool alyzed in a report to the Pacific Cooperative Wool Growers from the National Wool Marketing corporation, is the sharp decline in importation.

Imports of combing and cloth-

000,000 pounds, a sharp decrease from the 1929 imports, which were about 102,000,000 pounds. For the past five years there has been imported into this country approximately 155,000,000 pounds of foreign combing and clothing wool each year, hence the 1920 total represents a gratifying decrease The total of all foreign wools imported into the foreign wools imported into the United States in 1930 was 162, showed a maximum loss of but 2- Barley, ton 0a0,000 pounds, against 1929 imports of 277,000,000 pounds. Imports of carpet wools during 1930 totalled 93,000,000 pounds, compared with 175,000,000 pounds in

L is pointed out by the National Wool Marketing corporation that since adequate tariff has been provided for American grown wool there has been a marked tendency on the part of mills in this country to increase the proportion of domestic wools

During 1930 the consumption of foreign combing and clothing wools by mills reporting to the government was nearly 30 per cent less than for 1929, 33 1-3 per cent less than for 1928, and 33 1-3 per cent less than for

imports during 1930 is due chiefly to the marketing program of the National Wool Marketing corporation which has given the grower the fullest possible protection of the tariff and has given the him preference in the domestic markets. As a result of this activity of the grower-owned marketing organization, stocks of foreign wools in this country are less than they have been for some time, which will prove an important factor in stimulating improvement in the domestic wool provement in the domestic woel
