## FOODSTUFFS SALES HOLD SECOND RANK

Nearly Four Million Spent Here for Edibles, 22 Cents of Dollar

**EDITORS NOTE:** This is the third of a series of short articles showing how the retail dollar is divided in a typical year in Salem's business.

Next to the automotive group of retailers, those handling food products receive the largest percentage of each dollar spent in Salem. The United States census for 1920 shows that nearly \$4,000,000 was spent for food in the 12-month period covered by the survey, this amounting to 22 cents on the dollar spent.

**Employee Number** 234, Census Shows  
This business was distributed to 115 establishments who employed 214 full-time workers and who paid out in wages and salaries \$318,000. Of these firms, 58 were groceries, 47 handling groceries alone while 31 others also sold meats to their customers.

Salem was generous in its expenditures with candy stores, the report shows. During the year \$209,000 was spent in 21 different confectioneries. Meat markets received \$654,000 during the year these figures not including receipts from sale of meats in stores which also handled groceries.

## DOCTOR'S WAY to train Child's Bowels

This simple prescription offers the best way yet discovered to train the bowels of men, women and older people—to make them regular as clockwork. This is so well known that another important fact is sometimes overlooked.

Dr. Caldwell's Syrup Pepsin is ideal as a laxative for babies and children.

Every child loves its syrupy taste. It does not sicken. It cannot gripe. It is quickly and thoroughly effective—and absolutely safe. You can use it even with an infant.

You have a famous doctor's word for this laxative—one whose experience covers forty-seven years. His record of having attended over 3500 births without loss of one mother or child is believed unique in American medical history! Give a little Syrup Pepsin if your child's bowels fail to move as they should. Use it to relieve those headachy, bilious, feverish spells. It will keep bowels from clogging during colds or children's diseases. It clears coated tongue, taints breath; increases appetite; helps the whole system. All drug-stores.

## ERICKSON SPEAKER AT ROTARY SESSION

Willamette university supplied the program at Rotary club Wednesday. Dean F. M. Erickson was the speaker and outlined some of the problems of edu-

cation. Standardization has been forced on the institutions, and has eliminated those who would not measure up to standards set. Willamette has had to meet the approval of various examining boards in order to gain support and recognition, and has built up its work to meet such conditions. Great developments in the field of educational measurements have come about in recent years. Tests have been perfected by which teaching efficiency is de-

termined and scales of progress for students set up. With all this however the institutions know that they must treat the individual as an individual. Prof. Cameron Marshall of the school of music, and Doris Clark favored the club with vocal solo numbers. Rotarians are planning to attend the district conference in Portland the last week in April, and efforts are being made to get a large delegation from here.

One of the best ways to overcome between-meal fatigue is to eat a sweet of some sort or drink a beverage sweetened with sugar.

**stop work when you're tired out ... eat something sweet**

It's HARD to keep from making mistakes when you're tired out. And the more you try to fight off fatigue unaided, the quicker you'll reach a state of exhaustion. The thing to do when you feel fatigue coming on is to stop work for a few moments and eat or drink something that contains sugar. The body is quickly revived by the physical rest and the "bite" of sweet food which is immediately digested. Small cakes, cookies, candy, carbonated beverages, tea, coffee, chocolate and flavored milk drinks are appropriate for between-meal fatigue. People everywhere have proved the pick-up value of these snacks. Most foods are more delicious and nourishing with sugar. The Sugar Institute.
