Goes places and does things... that's Chesterfield. The same good-tasting cigarette wherever smokers light up. For what you taste in Chesterfield is the aroma and flavor of milder, better tobaccos, blended and cross-blended to bring out the finer qualities of each tobacco. That's why smokers find the change to Chesterfield a real change.

FOR NINETEEN years, our Research Department has kept intimate touch with every new development of Science that could be applied to the manufacture of cigarettes. During this period there has been no development of tested value or importance to the smoker which we have not incorporated into the making of Chesterfield cigarettes.
