

MINOR REPAIR JOBS PREVAIL

Building Permit Total Low Although Nine Issued in Past Week

Building permits issued last week by the city building department totaled but \$1,454, the lowest total in months. Only one new structure, a \$235 garage, was listed under new construction. All other was for minor repair or re-roofing work.

Permits were issued to the following:

- W. A. Saurensis, alter dwelling, 1584 Chemeketa street, cost \$100; builder, Dave Delano.
- A. W. Maw, re-roof dwelling, 2185 North 4th street, cost \$140, by Doughton and Sherwin.
- Mrs. V. Ancyry, re-roof, 1955 North Capitol street, cost \$105, by Carlton Pioneer Roofing Co.
- Carl C. Wais, re-roof, 910 S. 13th street, \$135, by Carlton Pioneer Co.
- F. J. Hibler, re-roof, 795 North Church street, cost \$139, by Carlton Pioneer Co.
- Western Loan Association, repair dwelling, 1355 Cross street, cost \$150.
- F. J. Miller, repair dwelling, 1590 North 5th street, cost \$100; builder, Ernest Cox.
- Hal D. Patton Est., boiler room, 340 State street, cost \$350, builder, J. A. Bernard.
- Hazel Todhunter, erect garage, 589 North Sumner, cost \$235, builder, J. V. Thompson.

Youth Dies After Trip From South

TURNER, May 23.—The funeral of Vincent Rice was held at the Methodist church Friday morning at 10 o'clock with Rev. W. S. Burgoyne officiating. The young man came from California a week ago to visit his parents, Mr. and Mrs. B. Rice, after having suffered from pneumonia. The trip was too much and he suffered a relapse and died Tuesday evening.

Tallman Piano Store Improved

The Tallman Piano company store on South 12th street is undergoing repairs, a new front having been completed during the past few days.

A HOUSE PLANNED WITHIN A RECTANGLE

By R. C. HUNTER, Architect, New York

Editor's note: A "Portfolio of 101 Small Homes" by R. C. Hunter, architect, is offered to readers for \$2.50. Send check or money order.

A house with a rectangular plan is invariably the most economical to build and maintain. A plan approaching a square in shape gives the maximum contained space for a given perimeter. It can be readily understood that a house with a minimum exterior wall space requires less heat in winter and reduces painting and maintenance costs. The initial installation of plumbing and heating lines costs less for the square plan.

type of house is to design a satisfactory exterior, one that will not give a "boxy" appearance. In the example shown here this objection has been overcome by the manner in which the roof is treated. The low, sweeping roof lines and wide overhanging cornice give the house an appearance of additional length and foreshorten the depth. The simple flat entrance doorway in contrast with the projecting bay window lends interest to the front facade. The house is simple and inexpensive to construct. The sidewalls are covered with the wide siding painted light cream color and the roof is of shingles stained in variegated shades of brown. The blinds and shutters are painted green.

SMALLEY BETTER; CASE IS DELAYED

Secretary of State not to Take any Action Until Court Decides Blame

Howard Smalley, manager of a local gasoline distributing plant, who was injured in an automobile accident at the corner of Hood and Winter streets Friday night was resting easily at Salem general hospital and was on the road to recovery, according to reports from that institution.

Smalley was taken to the hospital following the accident in which his light car collided with that driven by William A. Hammond, recently appointed head of the state bureau for the examining of applicants for drivers' licenses. Because of assertions by witnesses to the effect that Hammond was driving at a speed which was an excess of 50 miles an hour, he was arrested for reckless driving by the city police.

On promising to appear in municipal court Saturday morning, Mr. Hammond was released. Saturday the case was continued until Wednesday morning at 10 o'clock.

Hal E. Hoss, secretary of state for Oregon, stated Saturday that any action taken by the state on the matter would follow and be governed by the decision of the municipal court in regard to the reckless driving charge.

Smalley was thrown through the wind shield of his car after it was thrown over 40 feet, according to reports. His life was saved after his external jugular vein was severed by the quick action of Hammond and George Moorhead, 865 Hood street, a witness to the accident, when they applied pressure to the vein.

SCHOOL ART SHOW STANDARD GAINING

Exhibit Closed Saturday Outdoors Marks Made Previous Years

Outdoing high marks of previous years, doors were closed late yesterday afternoon on the annual art exhibit sponsored by pupils and teacher of Salem school under direction of Mrs. Ida M. Andrews, supervisor. The exhibition, placed in the assembly at the high school, did not attract as many Saturday visitors as usual, although a large crowd witnessed the program and "living" pictures displayed Friday night.

Each school had some outstanding piece of work on display, and even the grade children's work reflected a nicety that speaks well for the instruction given and the prospects for finer work as they older grow.

Highland Pupils' Showing Excellent

An electric products map, made and displayed by pupils of grade school, attracted considerable attention. Highland pupils probably had as large variety of work, including woven rugs and illustrated and framed pieces made in connection with a poetry project, as any school. The senior high school exhibited the most finished work of course. A series of miniature stages, peopled, contributed by the high school art classes, attracted comment.

Several schools had made large panels in connection with projects, or simply as a piece of art work, these including Leslie and Alaska. Parrish exhibited some cleverly made and colored wastepaper baskets, and among the other novelties was soap carvings displayed by Englewood school.

LUMBER BUSINESS ABOUT LEVEL NOW

SEATTLE—A total of 341 mills reporting to the West Coast Lumbermen's Association for the week ending May 16 operated at 45.57 per cent of capacity as compared to 45.75 per cent of capacity for the preceding week and 68.21 per cent of capacity during the same week last year. For the first 19 weeks of 1931 these mills have operated at 40.83 per cent of capacity, as compared to 65.24 per cent for the same period in 1930.

Current new business reported by 221 identical mills was 6.66 per cent under production, and shipments were 10.15 over, New

rail trade business received during the week was about \$50,000 less than the volume reported for the previous week; decreases of about 10,500,000 feet in the export trade and \$60,000 feet in the local trade were reported; while the domestic cargo trade gained about 10,200,000 feet, making the total new business approximately 1,500,000 feet less than the previous week and 2,000,000 feet less than during the second week previous.

During the past 24 weeks orders for 251 mills have averaged 10.03 per cent over production. Inventories are now lower than at this time last year, the Association stated, and unfilled orders are holding at about the equivalent of four weeks' production at current levels.

Wells Bring New Car Over Country

RUBBARD, May 23.—Mr. and Mrs. Hugh Wells returned Thursday from a five weeks' trip to Minnesota starting for the return trip Saturday afternoon. They returned in a new car purchased in Michigan. They experienced changeable weather—that of extreme heat and then extreme cold. The coldest weather was found in the mountains in Colorado.

Building Rate Low in Oregon

Building activity in southern Oregon is as slow as in Salem, according to W. J. Liljeqvist, of Hanson and Liljeqvist, who has just returned from a short business trip to Klamath Falls.

"In fact building is low all over the country and Salem is no exception," he stated.

Extension Work Of U. of O. to Continue, Word

The University of Oregon extension division is planning to go ahead with classes in the Salem center next fall and winter, as in the past six or eight years, W. G. Beatty, who has directed the work here, said yesterday while in the city from Eugene.

Extension classes were well attended last fall and winter, and the first time in the history of the work enrollment in the winter term surpassed that of the earlier term.

The PAUSE that SAVES MONEY on House Paint

Is it smart to save 75c at the Spigot and waste dollar after dollar at the Bung?

BEFORE you buy any house paint or let any contract, pause long enough to get actual figures on the year in and year out economy of NEW ERA House Paint as compared to "ordinary" house paint. Of course, you may save 50c to 75c per gallon on ordinary paint. But you get short covering quality. You use 30% more gallons. You get 40% shorter life. In five years you paint twice with ordinary house paint to once with Acme Quality NEW ERA. In other words, by paying a few cents more per gallon for this super-quality paint, you save by the job and by the year. Ask us for the actual figures of what this NEW ERA economy will mean on your house. Do this before you spend a nickel for house paint of any kind.
