

BISHOP FINDS OUTLOOK GOOD

Big men not Whining, Word Brought by Merchant After Jaunt East

"We are sitting pretty here in Salem. I urge you fellows to keep in that place, to keep on working and to keep sweet." Thus did C. P. Bishop summarize his observations on Salem's business condition after an extensive trip through the east where he attended as Salem's delegate the convention of the national chamber of commerce and the convention of the international chamber of commerce. He spoke yesterday noon to the chamber of commerce here.

"Business is as good here as any place I saw," Bishop declared. "We are all big men here, carrying on our business as big men should. I observed at the conventions that the leaders there were going ahead as strong as ever—were not crying and were keeping cheerful and hopeful."

Mr. Bishop declared that Russia presented the biggest enigma to the American business man. He pointed to its enormous acreage of farm land, to the huge deposits of oil and coal, all of which he said Russia might dump on to the markets of the world.

Heover not Given Depression Blame Bishop said it was the consensus of opinion at the conventions he attended that President Hoover

ver and his administration had not been responsible for depression in business since the depression was world-wide in its extent. He declared the Hawley-Smoot tariff was not very popular.

"I know you're not going to permit any letting down of the tariff," the speaker laughingly suggested to Congressman Hawley who was in the audience.

The consensus of opinion in the east is that the farm board has rendered a service in preventing prices going down too rapidly for producers.

"The international silver question has been on my mind a good bit," the speaker said. "I confess I have been a gold standard man, probably because my father was a gold standard man. But the need of money in India and in China in order to resume foreign trade there makes me feel we might well take a part in an international conference to discuss the demonetization of silver that now exists and to work out some plan to restore a stable money to those countries."

DIVORCED

The "tiniest aviatrix in the world," Margery Brown (above), was granted a divorce in Reno the other day when she said that while she loved babies, her husband, Sanford Brown, millionaire manufacturer, forbade her to have any. Margery is only four feet eleven inches tall and when she took her first solo flight in 1927 at New York, she had to sit on a soap box and pillow to see above the cockpit.

Consider your Adam's Apple!!* Don't Rasp Your Throat With Harsh Irritants

"Reach for a LUCKY instead"

What is the effect of irritation upon the throat? Here are the exact words of a noted authority retained by us to study this question. He writes —

"First, the vocal chords, on account of their delicacy of structure, would be the first tissues to give indication of irritation, evidenced by the huskiness of the smoker's voice, the result of relaxed tension and slower vibration of the vocal chords. The next site of irritation would be the tissues adjacent to the vocal chords comprising the larynx, therefore the general focal point of the irritation would be in the voice box represented externally by the Adam's Apple."

So — Consider your Adam's Apple. Be careful in your choice of cigarettes. Don't rasp your throat with harsh irritants. Reach for a LUCKY instead.
