Moltzner's accusations that Commissioner Mott had "maliclously" interfered in the affairs of the associations and circulated false statements about them were "not supported by a single word of competent testimony in the record," Judge Lusk wrote.

"On the contrary," he continued. "the record shows that Mr. Mott, finding evidence of illegal practices by the Guardian Building and Loan association and of an unsound condition in all the associations, did nothing more nor less than his sworn duty as a publie official."

The association's consent to the appointment of Kavanaugh as a receiver, the order said, "was given for the uprose of frustrating the corporation commissioner in the performance of his statutory duty x x x. And I am satisfied that it was done in order to serve

Recent attempts on the part of a large distributing organization in the state to block the organiza-

The negative attitude taken by distributors and their refusal even to attempt to work with the producers is declared to be the cause of the present crisis.
