Mrs. Cornell writes from Ketchikan, "We are having a very pleasant trip and wonderfully good meals. They expect to go as far as Skagway before returning home. The Raven Flood totem at Ketchikan was one of the interesting things noted by Mrs. Cornell. Heaven is represented by a raven at the top of the totem pole and legend is that the raven's flood time flew up to heaven with children in his arms to save them. When the flood subsided, he descended (represented by two figures from the top) and lighted on a piece of kelp, represented on the totem by a frog."

WOODBURN LEGION TO NAME DELEGATES

WOODBURN, June 23.—The June meeting of the Woodburn American Legion post and the woman's auxiliary chapter will be held in the armory Wednesday night. As this is probably the last meeting to be held until September, much important business is scheduled to come before the meetings.

Dr. J. M. Hanrahan will preside at the post meeting, in the absence of Oliver Olsen, who is at the National Guard camp at Clatsop beach. The matter of deciding whether the post and auxiliary post will hold meetings during the busy summer season will be settled Wednesday night.

A delegate to send to the annual state legion convention, to be held in Corvallis August 6, 7, and 8 will be chosen and instructed. The matter of Junior American Legion baseball will also be brought up. There is also a possibility that the post will decide on plans for an Armistice day carnival next winter. All members of the women's auxiliary are being urged to attend Wednesday's meeting by Mrs. Vena Dodge, president of the unit. A delegate to the Corvallis convention will be chosen. It has been definitely decided that the women's auxiliary chapters will not hold meetings again till September.

A program which promises to be very interesting has been arranged by a committee of women.

Hay Crop Heavy Farmers Report

MONMOUTH, June 23.—Farmers of this section are reporting an unusually heavy hay crop of all varieties. Thomas H. Gentle says he gave away a clover clipping crop as he will harvest fully 70 tons of alfalfa in two cuttings. Hay is selling in the field for \$4 to \$5 per ton. Recent rain has spoiled some that was down, but it is estimated that new clover and alfalfa crops will be so much heavier due to the rain, than was anticipated, that the present losses will be more than offset by the new growth. Gardens are much benefited by the rain, also spring grain. It is conjectured whether or not the rain will benefit fall grain.
