NO MORE HORSE - LAUGHS

REMEMBER what our school books taught us about the lives of inventors who lived many years ago? How often we used to read, "He went on with his experiments in spite of the laughter of his friends, and the ridicule of his neighbors."

How different is the modern state of mind! This age is remarkable for its keen awareness of progress . . . the eager willingness of most of us to accept new things, and better ways. The skeptical person is the exception — expectancy is the rule. If we read about an invention that will wash the middle of our backs, we say, "Fair enough; tomorrow there will be an automatic way to keep our noses powdered."

New things and better ways are announced regularly in this paper . . . in the advertisements. Every day you may be expecting something that will make your life easier, pleasanter, more healthful. Possibly a new electrical contrivance, or a car that's easier to drive, or a new idea in breakfast foods. Follow the advertising columns . . . and sooner or later you'll get the good news. People who make it a point to know what's going on read the advertisements every day.
