A development before the city council as the result of the supreme court's concurrence Wednesday with Circuit Judge Hill's invalidation of city water purchase bonds presented itself to City Treasurer Rice yesterday, It was the special water fund created by the city council last spring to meet outstanding bills incurred in connection with the pending purchase of the water company

Withdrawals from this fund total \$5943.03, the principal item of which is \$5000 paid to Baar & Cunningham, engineers. Actually the fund does not exist and the general funds of the city have een used to meet the withdrawals from the water fund. Pending another bond authorization, the water fund must remain overdrawn and the deficit made up in the 1932 budget of the city.

CHICAGO, July 9—(AP)—Alost duplicating low prices of the time when Shakespeare went on barnstorming tours in rural England, wheat sold at 53 % cents a bushel. Comparisons were evoked with records that wheat fetched 54 % cents at Winchester, England, in 1654, and that in 1601-02 King's college received wheat as farm rent credited

equal to 52% cents. New breaks in wheat were largely associated with Liverpool price setbacks resulting from cheaper Russian offerings and increased vessel charters for Russian grain export.
