Huckleberries Draw Many Unemployed; Bear Picks 'Em Too

LYONS, Aug. 19 — The highway is well lined these days with cars and peck horses, heading for the mountains to gather huckleberries.

And some of the pickers already on the grounds report man not the only one fond of huckleberries; for they watched a bear pulling off the fruit near where a group of humans were working.

Many people out of employment are spending a profitable outing in the hills above Detroit and most of them come out with several gallons of the berries, which are fine quality this season. Seventy-five campers were on the grounds Friday.

An 11-mile hike over the steep hills is a fascinating prelude to the actual picking, campers say. The weather is ideal, not too warm, and with a tinge of frost at night.

"TOASTING" expels SHEEP-DIP BASE naturally
(Black, biting, harsh irritant chemicals)

present in every tobacco leaf

"They're out—so they can't be in!"

Every LUCKY STRIKE is made of the finest tobacco leaves the world can offer—the finest from Turkey—the finest from Kentucky, Tennessee, Virginia, Georgia and the Carolinas—the Cream of many Crops throughout the world. But all tobacco leaves, regardless of price and kind, as nature produces them, contain harsh irritants. LUCKY STRIKE'S exclusive "TOASTING" Process—a process that mellows, that purifies, that includes the use of the modern Ultra Violet Ray—expels certain harsh irritants naturally present in every tobacco leaf. We sell these expelled irritants to manufacturers of chemical compounds, who use them as a base in making sheep-dip*, as well as a powerful spraying solution for trees, flowers and shrubs—enough to permit the daily dipping of over 50,000 sheep or the daily spraying of many thousands of trees. Thus, you are sure these irritants, naturally present in all tobacco leaves, are not in your LUCKY STRIKE. "They're out—so they can't be in!" No wonder LUCKIES are always kind to your throat.
