# WORSE THAN WAR!

50,510 members of the A. E. F. were killed in action or died of wounds during the eighteen months that we were engaged in the World War.

51,400 persons were killed in automobile accidents during the eighteen months ended December 31, 1930. The number of automobile deaths may exceed \$5,000 in 1931. Truly, the situation is worse than war!

There is no panacea which will quickly reduce the number of automobile accidents. No law, no great achievement in highway construction, no basic improvement in automotive design can stop people from maiming themselves and their neighbors on our streets and highways, even though better laws, better highways and better cars all help. The automobile accident problem is primarily a personal problem. Every automobile driver must realize that and do his part. Every pedestrian must feel his responsibility. And if each driver would make it his business to operate his car in as careful, considerate and courteous a manner as possible, and if each pedestrian would keep on the alert when he is crossing the streets or walking on the highways, our automobile casualty list would be materially reduced.

Just a little less hurry, a little more courtesy and consideration for others, and a little more attention at all times, whether walking or driving, would save thousands of lives and prevent hundreds of thousands of injuries.

A second of time will not replace a human life.
