## Deer and Beaver Early Populace Of Lake Region Now Most Prolific, With Labish Onions, Celery Famous

By W. R. GWIN  
The lower end of Lake Labish touches the Pacific highway at Chemawa, some five and one-half miles from Salem, north. From there it runs northwest in a narrow strip (never wider than a half mile) for approximately four miles.

The name, Labish, derives from the French biche, or deer; hence, Deer Lake. The lake proper was, before drainage, rather a combination of swamp, underbrush, and lake. Forty years ago, when there were few settlers west of them French, there were many deer in the vicinity, and there are tales of Indians, devices for bagging game, legends of prowess of the local hunters, stories of the tribulations and compensations of the early settlers in the local verbal idiom.

The lake proper is now, after draining, perhaps the most prolific and valuable land in Oregon. The soil is an amalgam of decayed vegetation—strawberry, swamplands, trees and the like. It is generally referred to as "beaverdam," because of the fact that many beaver infested the lake in days gone by, and their nibblings are evident in the Labish soil today. The beaver, with their valuable hides, furnished many of the early settlers with a living while they worked at clearing the lake and cutting wood in the lush forests which surrounded the lake.

Today Lake Labish land is valued variously from \$1000 per acre to \$2500 per acre, depending on the owner's whim and the depth and quality of the soil. Some of the soil runs seven or eight feet deep, while in spots it has worn away to less than a foot. The greater share of the rich land is deep enough to last several centuries; it settles slowly and washes away imperceptibly.

It is not necessary for a local farmer to be satisfied to make a family a very decent living, and one who owns 10 acres is a comparative plutocrat. The chief crop is the large, comestible onion, although there is much peppermint raised, some spearmint, a few potatoes, and near the Pacific highway the Japanese raise a great amount of celery, lettuce, and other garden stuff.

There is a store and service station at Lake Labish, owned by Hal Welton, and there is a store and service station at Labish Center owned by Mr. Harris, who also owns a considerable acreage of onion land.

There are good traveled roads through the Lake community and prospects are that they will be paved within the next year or two, thereby connecting the Lake with a market road to Silverton, Mount Angel, and other communities.

That the Lake is prosperous is evidenced by the general air of affluence and the fine homes and worldly goods; and, it may be added, their places. Their homes are always on the upland, and they raise some produce on the upland, there are orchards and vineyards in profusion, but it is, after all accounted for, the fertile lakeland that makes Labish the rising, plebeian community it is.
