"More genuine satisfaction than any car I ever owned"

THE FORD is good-looking. It is safe. Comfortable. Speedy. Reliable. Long-lived. Economical. Everything a good car should be.

There is, too, an added something about it that brings enthusiastic comments from every one who has ever driven a Ford . . . the joy it puts in motoring.

"I have been a car owner continuously for nearly 20 years," writes a motorist connected with a leading university. "During this period I have bought eleven new automobiles. Eight of the eleven were in the middle-price field, one cost three thousand dollars, and the last is a Ford I purchased thirteen months ago.

"In the light of this experience I can say in all sincerity that I have derived more genuine satisfaction from the Ford than any car I ever owned. In

saying this, I am thinking in terms of comfort, safety, driving pleasure, ease of control and economy. My next car will also be a Ford because it will give me what I want at a price I can afford to pay."

When you get behind the wheel of the Ford and drive it yourself you will know it is a truly remarkable car at a low price. You will like it when you first buy it. You will become more and more enthusiastic the longer you drive it. After thousands of miles of driving you will say "it's a great car." Its economy will save you many dollars.

FIFTEEN DIFFERENT BODY TYPES \$430 to \$640 (F. O. B. Detroit, plus freight and delivery. Bumpers and spare tire extra at low cost. Conventional economical terms can be arranged through your Ford dealer.)

FORD MOTOR COMPANY

You purchase shoes, fruit and candy. You call for cigarettes.

It's like this: WHEN YOU GO TO BUY A PAIR OF SHOES, you examine the leather, the way the shoes are made, their shape. You try them to see if they fit—if they satisfy you.

Why not follow the same method in purchasing your cigarettes? You want cigarettes that are made from the very best tobacco—mild, ripe, sweet. You want them made right. You want them free from harshness and bite and "pinches." In other words, you want cigarettes that satisfy you.

WHEN YOU GO TO BUY FRUIT—oranges, grapefruit, apples—you want ripe fruit, fruit that has matured before being taken from the tree; fruit that has been handled right and packed right; fruit that's the same throughout—not green on one side and ripe on the other.

Why not apply the same test in purchasing your cigarettes? You want cigarettes made from tobaccos handled right by the farmer—ripened, sweetened in the sun and cured right. You want cigarettes that taste the same, day in and day out. You want them pleasing in taste—mild and satisfying.

WHEN YOU BUY CANDY, you want to know, above all things, that it is pure. Is it real candy or are there a lot of other things mixed in with it? And you want it fresh. You want it freshly made and you want it so packed as to reach you just as it was when it was made.

Why not apply the same test when you buy your cigarettes? You want a cigarette that's pure; for purity counts in cigarettes just as it does in candy. Then again, you want a cigarette that's just as fresh as when it was made.

Now, if you apply to cigarettes all the tests that you apply in buying shoes and fruit and candy you will purchase CHESTERFIELD like millions of other smokers.

First, because tobacco men will tell you that in Turkey, Kentucky, Georgia, the Carolinas, Virginia, and Maryland, only the mildest, ripest tobacco is bought for CHESTERFIELD—tobacco cured by the sun's pure rays, by the farmers' slow-burning ovens, and finally by great high-pressure steam drying machines. In the tobacco regions where they grow tobacco and know tobacco, CHESTERFIELD is usually the leading seller.

Second, because the carefully selected CHESTERFIELD tobacco leaves are blended and cross-blended. This exclusive CHESTERFIELD blending method is not just mixing together different tobaccos—it is mixing them in such a way as to bring out the finer qualities of each. It's like producing a new and better type of tobacco—tobacco with greater mildness, more smoothness, much better taste.

Third, because the cigarette paper is selected with the same care. CHESTERFIELD paper is the purest, the best that money can buy. Then the cigarettes are made and packed by machinery in clean, sanitary factories. And the moisture-proof, attractive package—free from heavy inks or inky odor—comes to you just as if you passed the factory in the morning and took your CHESTERFIELDS from the machine.

Good . . . they've got to be good.

Debate Disputes Settled in House In Middle Grove and Thereby Came Name for Farming Territory

By KATHERINE SCHARF
Middle Grove is a community which lies about four miles northeast of Salem on the Silvertown highway. It is bounded on the northeast by Central Howell, on the north by Hazel Green, on the west by Hayesville, on the south by Swegle, on the southeast by Pratum. It is truly in the "middle" of things.

The school and church buildings which stand on opposite sides of the Silvertown highway are in the center of the community. The first school building built in 1870 stood on a knoll directly south of where the church now stands. From there it was moved to land donated by John Savage on his donation land claim near where Orion Hillficher now lives. Later, about 1880, the present school site was secured on the William Herren donation land claim.

The first school was a member of a debating organization made up of the Riekey, Howell and Middle Grove schools. The building stood in a grove of large fir trees and since it was so centrally located it was named Middle Grove. The first teacher was Mr. McKinney and W. T. Ramsay followed him.

Large Land Owners voted extensively to the raising of grain. But about 1890 when more and more settled here, hops were set out and formed. The principal settlers and large land owners were the Herrens, Savages, Johnsons, Munkers, Martins, Van Horns, Swartzs, Simons, Topars, Gilmores, and Harkieroads.

The Savage donation land claim was composed of 640 acres, part of which is still in the possession of the descendants. Part was divided into tracts which form a part of what is known as Hollywood rural community.

The creek, which runs near the school, has always been known as Bear's Run because of the number of fine trout to be found there part of the year and which provided a feeding place for bear in early days.

The roads which have many curves in them were formed from old Indian trails which the Indians traveled from Grand Ronde and Silverts place, on which W. H. Scharf now lives, was a stopping place for them and that on the place was an old Indian burying ground.

One of the first wells dug was on the John Martin place which is now owned by Lee Clark.

The district is still a farming district with one hop yard. The Evangelical church was built by C. J. Bartruff and Robert Leeb in 1918.

Towler Savage and son John Savage, great grandfather and grandfather of George Savage, now a resident of Salem, came across the plains from Michigan with an ox team and reached Salem Sept. 7, 1847. On the first night of their arrival they camped where the Salem Pulp and Paper company now stands.
