ROY R. GILL TELLS ABOUT BIG PROJECT

Columbia Basin Job to get All his Time, he Says On Trip Home

SCIO, Oct. 21.—Mr. and Mrs. Roy R. Gill were visiting home folks in Scio Tuesday. He has decided to give his entire time to the task of putting the Columbia basin project through congress. This great project occupies the same place in the Pacific northwest that the Colorado river project does in the southwest and when started will start a large flow of wealth and population into the northwest, Mr. Gill believes.

He has just returned from Washington where he was called by Commissioner Mead of the bureau of reclamation to sit in on a conference of federal engineers to work out a new plan of development to put before congress this winter. A board of 12 engineers was appointed from the war department and interior department to come out and make a final check upon this plan. They met in Spokane October 15 and have been going over the project since that time. Mr. Gill will start motoring back to Washington as soon as those engineers finish their work which will probably be this week.

This new plan would be helpful in relieving unemployment in the northwest, first by taking farmers out of the city and putting them back on their own farms, second by starting private enterprise, Gill says.

There would be no new land brought in under this plan as all the land of the first unit of 60,000 or 100,000 acres has been homesteaded and successfully farmed for a quarter century and only abandoned when this dry cycle came on. As the land has always raised wheat it would be converted to alfalfa, vegetables, dairying and fruit, thereby reducing the surplus to some extent. It will take eight or ten years to put water on any of the land at congress authorizes the project.

State Buys Dallas Water Bonds; Rate Tops Five Per Cent

DALLAS, Oct. 21.—The Dallas council authorized the sale of the water bond issue to the state of Oregon at the meeting Monday night. The bond issue is for \$120,000 and was let to the state at a rate of interest of 5 1/2%.

The bonds are to be retired within a number of years from the profits of the water plant. The bond issue for the purchase was voted at a special election held in September. The water commission selected to supervise the plant consists of five members, none of whom may hold any political office. The plan provided that one commissioner shall be appointed each year by the mayor with the consent of the council.

The commissioners chosen to start operations on the water plant are: August Risser, N. L. Guy, C. W. Henkle, Walter S. Muir and Joe Craven.

quality

the word value is being tossed around quite a bit of late—but we prefer to talk quality.

when you buy the best quality you buy, the best value.

that is a fact one cannot get around—clothes that fall down in satisfaction, style and service are poor values at any price.

we recommend Kuppenheimer good clothes as the best value you can possibly buy.

despite the ruthless tendency towards cheapening of quality, Kuppenheimer has always kept the quality up—not one stitch have they yielded to mediocrity.

such merchandise represents genuine value in the highest sense of the word.
