

'SILVER STREAK' IS WILLYS NAME

Commemorating its 25th year as a manufacturer of automobiles, the Willys-Overland company announces an entirely new line of Silver Anniversary cars for 1932, featuring the "Silver Streak 100,000 Mile" motor in the low priced Willys-Overland sixes and eights, and the "Twin-Sleeve" Knight motor in the popular priced Model 95 Willys-Knight and the DeLuxe line of 66-D Willys-Knight custom models. In performance as well as appearance these three Silver Anniversary cars are the outstanding models of Willys-Overland history with power outputs ranging from 60 to 87 horsepower and high speed ranges from 70 to 80 miles an hour — more than ample to meet all the demands of modern motoring.

In design they conform to the highest standards of modern craftsmanship, while their remarkable power, speed and economical performance have been unquestionably proved in the most exhaustive tests ever made by any car manufacturer.

All of the vast manufacturing and engineering facilities of the Toledo manufacturer were called into action in the development of these anniversary models, and the results accomplished are outstanding.

The "Silver Streak 100,000-Mile Motor," is the Willys-Overland six, in all of its fundamentals, is identical with its predecessor which has won first and second places in the annual Pike's Peak climb in 1930 and 1931, in addition to establishing 16 A. A. speed records for cars under \$1000.

Add Varieties To Gas Tanks

After 12 years steady service in dispensing Shell gasoline to the exclusion of all other brands, Smith and Watkins have added Union and Texaco and Texaco ethyl to their battery of pumps, with the idea of appealing to the varied tastes of motorists.

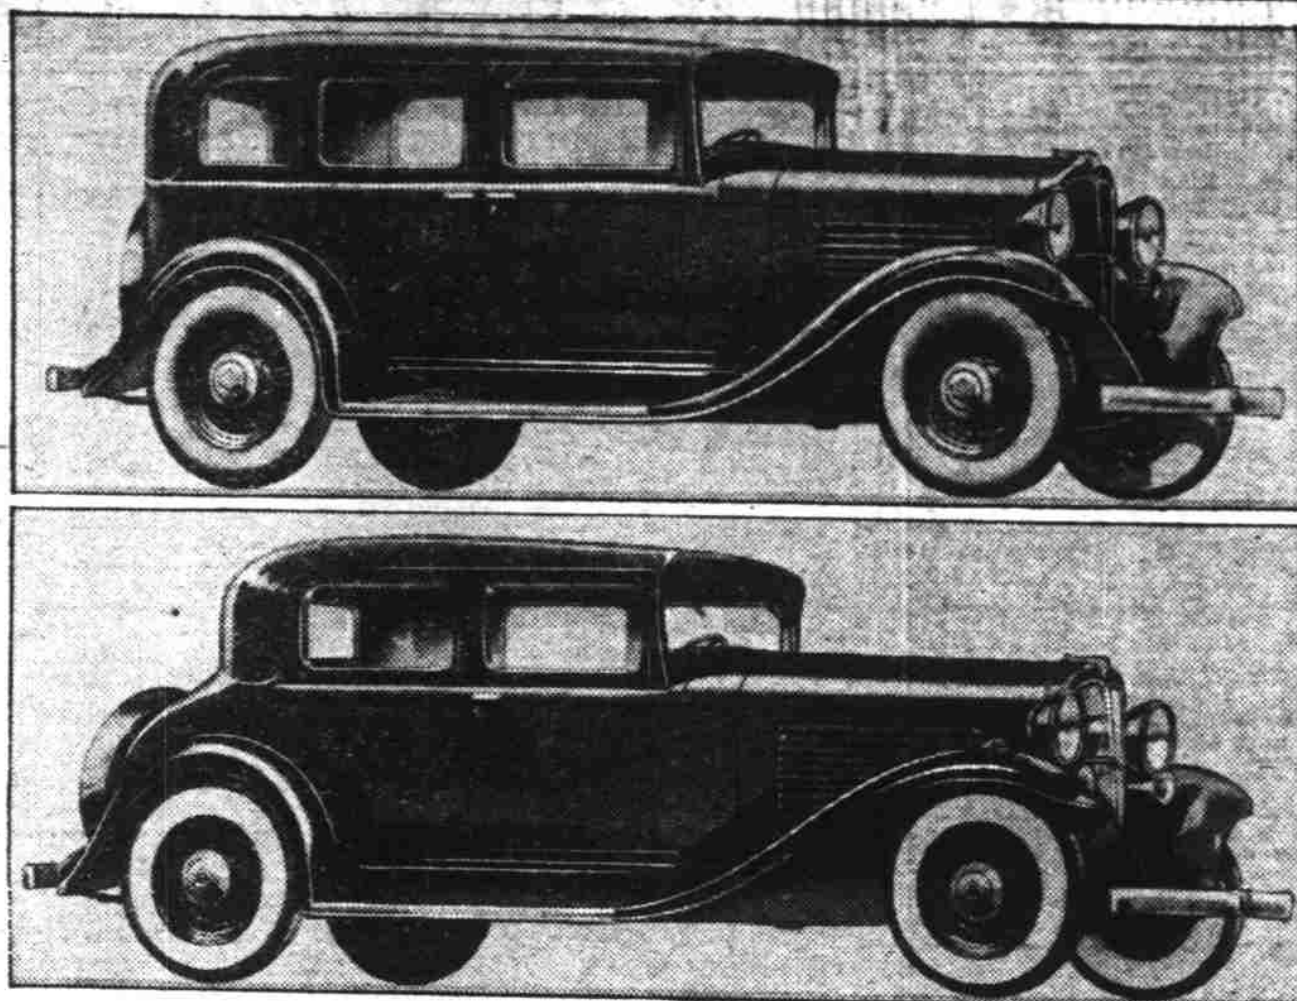

Other lines handled continue the same with Firestone tires a specialty.

NEW WILLYS-OVERLAND SIXES AND EIGHTS HERE

One of Willys-Overland's major contributions for 1932, in observance of its Silver Anniversary, is the presentation of new Willys-Overland Sixes and Eights. Above is shown the Willys-Overland Six Sedan, powered by the dynamic "Silver Streak 100,000-Mile Motor," the same engine that has twice won the Pike's Peak race and holder of 16 other A.A.A. speed records. The modern bodies of this entire line of low priced Sixes are marked by smartness, comfort and luxury. The roominess of the interiors sets a new example of design.

Below is the powerful Willys-Overland Eight Victoria Coupe. This smart model also is characterized by modernistic design, while in performance, its 80-horsepower "Silver Streak Motor" meets every demand of modern motoring.
